1. General info & Installation

1.1 Few words on start

"**Brandon**" is the new era of building websites. Totally new Muffin Builder, lot`s of shortcodes, Muffin Slider, Full Width Portfolio, Swipe Technology, Revolution Slider or detailed Muffin Options panel. Be sure that with our new theme you can easily customize whatever you want on page. Please also note that all those options are amazingly easy to use.

1.2 Package from themeforest

At first, after purchasing this theme please download the package from Themeforest. All you need to do that, is move your mouse over your login name **in right top corner** (of course after you`re logged in Themeforest) and then click **Download**. Here you will find all the items that you have purchased. It looks exactly just as the diagram below:

In the next step click the **Download > Main File(s)** button next to Brandon theme and save package on your computer.

In the package you can find things like *documentation, license, psd files, zipped file with theme files* and folder with theme files called **Brandon**. Please unpack the whole package after downloading it from Themeforest.

1.3 How to install & update it?

At first please make sure that you have unpacked the whole package shown in the last point. **This is very important!** You can complete installation in two different ways:

1. **WordPress Theme Manager** - please go to **Appearance > Themes > Install Themes > Upload**, select zipped theme folder called "Brandon.zip" and press *Install Now* button. The wordpress will do the rest for you.
2. **FTP upload** - upload non-zipped theme folder called *Brandon* to */wp-content/themes/* folder in your WordPress installation folder on your server.

In the second part of this guide we have described how to update **Brandon**. Please make sure that you didn't make any changes in the files. If you have made changes and you don't want to lose them, the best way is to use one of freeware tools for comparing files, ex. [Beyond Compare](#) (we are not the authors of this tool so please don't ask us how to use it. Answers to how to use it can be found on their website). After comparing these files you can upload on server only the files that hasn't been changed.

If you haven't changed any theme files, all you need to do is update your version of theme by downloading the latest package from themeforest, unpacking files and uploading new files on the server while replacing the old files. Simply overwrite them.

All your data in the database are safe because after updating theme files doesn't change anything in the database. Please however always make a backup of your files & database.

2. Page creation

Creating your own page has been never so easy. To make the first step please go to *Pages > Add new*. On first sight everything looks just like in default wordpress. But when you have a look under *Visual/HTML* area you will see some *Page options*.

2.1 Getting started

The screenshot displays the 'Page Options' interface for Muffin Builder. At the top, there's an 'Add Section' button and the Muffin Group logo. The main area is a drag-and-drop content builder with several rows of widgets. Each widget has a title, a description, and a '1/1' or similar indicator. The widgets include:

- Feature Box (FULLY CUSTOMIZABLE)
- Feature Box (OUTSTANDING SUPPORT)
- Info Box (SOME INFO ABOUT THEME)
- Latest Posts (NEWS FROM COMPANY BLOG)
- Column (SAMPLE BOX)
- Testimonials
- Offer
- Quick Fact (countries)
- Quick Fact (languages)
- Column (WHY CHOOSE US?)
- Quick Form (Interested in our offer? Fill in this form. We will call you back.)

Below the content builder, there are several settings sections:

- Hide the content:** A toggle switch is currently set to 'OFF'. Text: 'Turn it ON if you build content using Content Builder. Use the Content item if you want to display the Content from editor within the Content Builder.'
- Layout:** Three icons represent 'Full width, No sidebar', 'Left Sidebar', and 'Right Sidebar'. The 'Full width, No sidebar' icon is selected.
- Sidebar:** A dropdown menu is set to 'Page'. Text: 'Shows only if layout with sidebar is selected.'
- Slider:** A dropdown menu is set to '- Muffin Slider -'. Text: 'Select Muffin Slider or one from the list of available [Revolution Sliders](#)'.
- SEO Title:** An empty text input field. Text: 'These settings overrides theme options settings.'
- SEO Description:** An empty text input field. Text: 'These settings overrides theme options settings.'
- SEO Keywords:** An empty text input field. Text: 'These settings overrides theme options settings.'

In first *Visual/HTML* area you can build your page using all available options in editor. Beyond the default options we included green button called "*Insert shortcode*". With this option you can build any page you want based on shortcodes. All available shortcodes for this theme has been described in section **Shortcodes (section 5)**.

Please note that you can build page based not only on shortcodes. You can also use Muffin Builder (section 2.2).

Below the **Muffin Builder** you can find some *Muffin Options*.

- **Hide the content** - this options will hide the content from Wordpress editor. You can turn this button on or off. If you`re using Muffin Builder for building content please turn this button off. If you won`t turn it off, the content from Wordpress editor will show above the Muffin Builder items.
- **Layout** - you can choose personal layout for each page. There is 3 options to choose: full width without sidebar, left sidebar or right sidebar.
- **Sidebar** - here you can select proper sidebar for this page (of course if in the previous option you have selected right or left sidebar). You can create your own sidebars in *Appearance > Brandon > Getting started > Sidebars*.
- **Slider** - you can select Muffin offer slider or one of the Revolution Slider's for page. Please also note that for each page can be different slider. Of course, before select slider you need to create it with amazing **Revolution Slider (section 3)**.
- **SEO Title** - title for page (if you leave this field empty, page will get default settings from *Theme options panel > Getting started > General*)
- **SEO Description** - description for page (if you leave this field empty, page will get default settings from *Theme options panel > Getting started > General*)
- **SEO Keywords** - keywords for page (if you leave this field empty, page will get default settings from *Theme options panel > Getting started > General*)

After set up all this options on right side you can also choose right Page Template (section 2.3) for this site.

2.2 Muffin Builder

What about **Muffin Builder**? With his help web development is child's play. Page can be splitted on totally different sections where you can choose things like colors, backgrounds, layouts, sidebars, classes and much more. For each section you can add an items that you need.

Now with the new Muffin Builder you can also do things like clone sections or items so building websites is much faster and easier. You will love it!

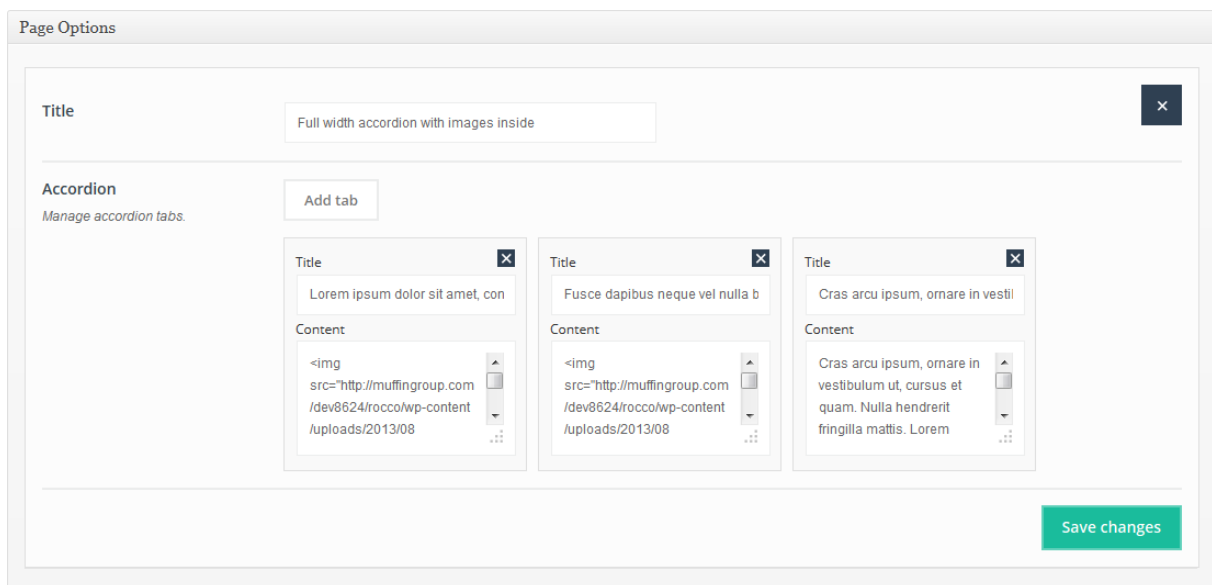

To add item inside section please click *Add item* button. After that you will see the right Item already added below. You can do few things with this added Item.

- Expand Item to 1/4, 1/3, 1/2, 2/3, 3/4, 1/1 by using "+" button in the Item. The same way you can shorten this Item using "-" button. Please note that not all Items working with all sizes.
- You can delete Item/Section if you don't need it by × in right Item corner.
- You can edit each Item/Section by click on "pencil" in right bottom corner in the Item.
- You can clone each Item/Section by click on "clone" in right bottom corner in the Item.
- You can also move any Item/Section by drag & drop.

Please remember that Muffin Builder is working only with *Default template*.

You can choose one of below items:

a) Accordion & FAQ

This Item is adding *Vertical tabs* on page. You can add as many tabs as you need, just type *Title* and *Content* for each tab. You can also use **Drag&Drop** option to set the order for items.

Available sizes: '1/4', '1/3', '1/2', '2/3', '3/4', '1/1'

Attributes: this item similar to Tabs Item doesn't have attributes like other Items. Instead of you can add new tabs by clicking "Add tab" and delete them by clicking ×.

The first is labeled 'Title' and contains the text 'Interested in our offer? Fill in this form. We will call you bac'. The second is labeled 'Contact Form Shortcode' and contains the text '[contact-form-7 id="9796" title="CallBack Contact Form']'. Below this field, there is a small example text: 'eg. [contact-form-7 id="000" title="CallBack Contact Form']'. A green 'Save changes' button is located at the bottom right of the configuration area.

Create short form on homepage with any fields you want for quick contact way.

Available sizes: '1/1'

Attributes:

- **Title** (title for Quick Form item)
- **Contact Form Shortcode** (get shortcode for form from Contact Form 7 plugin section)

Preview:

The preview shows a light grey rectangular box. At the top, it contains the text 'Interested in our offer? Fill in this form. We will call you back.' Below this text are two input fields. The first is labeled 'Enter your name' and has a person icon on the left. The second is labeled 'Enter your phone number' and has a telephone icon on the left. To the right of these two fields is a dark red button with the text 'SEND A REQUEST' in white capital letters.

NEW SPECIAL ITEM!!! SECTION

This is totally new item which gives you lot's of possibilities with creating pages. Now you can split each page, post or portfolio item for sections. Section is a part of page and can have own settings. Please take a look on image below to see what you can do:

Page Options

Background Image ✕
This option can be used only with Layout: Boxed.

Background Image position: Center Top No-Repeat ▼
This option can be used only with your custom image selected above.

Background Color: Use color name (eg. "gray") or hex (eg. "#808080").
Leave this field blank if you want to use transparent background.

Layout: Full width. No sidebar ▼
Select layout for this page
Notice: Sidebar for section will show only if you set Full Width Page Layout in Page Options below Content Builder.

Sidebar: Page ▼
Select sidebar for this page.

Padding Top: 40 px
Section Padding Top

Padding Bottom: 0 px
Section Padding Bottom

Custom CSS classes:
Multiple classes should be separated with SPACE.
For sections with dark background you can use class: dark

Attributes:

- **Background Image** (you can upload image/pattern for background section)
- **Background Image position** (choose position for background image)
- **Background Color** (you can choose color for background)
- **Layout** (you can choose if you want section with sidebar or not - each section can have own sidebar what is really amazing and people loves it)
- **Sidebar** (choose sidebar for section)
- **Padding Top** (you can add top padding for section if you want)
- **Padding Bottom** (you can add bottom padding for section if you want)
- **Custom CSS classes** (you can type own class for section - this is really great option for all those who want to get special style for section). For example you can add here **my-own-super-section** class and then you can go to *Theme options* > *Layout* > *Custom CSS* and write there own styles for this class:

```
.my-own-super-section { margin: 30px; padding: 20px; font-size: 15px; etc... }
```

This is just example of what you can do so please do not use above css :)

If you want to use multiple classes then please separate them with SPACE. We have one built-in class for this section which is named **dark** and you can use it if you want to get dark background.

2.3 Page Templates

Template has several specially designed Page Templates, which can be used on Pages, adding them special features.

Archives

This template can automatically create list, that contain *Available Pages*, *Latest Posts*, *Archives by Subjects* and *Archives by Months*.

Portfolio

This template let you to add Portfolio for website. You can see these entries in section *Portfolio > Portfolio*.

Sitemap

This template let you to create simple sitemap.

3. Slider options

3.1 Muffin Slider

Muffin Slider is simple slider made by our team and is dedicated for all those who want to make easy slides within very short time. Slider is built on swipe technology so it works on all mobile devices and is fully responsive.

To create slides for muffin slider please go to *Muffin Slider > Add new* section in main menu on the left side in WP Dashboard. Each slide have some Slide Options what you can see on image below:

The screenshot shows a form titled "Slide Options" with the following fields and controls:

- Title** (Slide Title): A text area containing the placeholder text "Fusce fermentum
 ligula at nisl sodales".
- Text** (Slide content text): A text area containing the placeholder text "Proin hendrerit molestie velit, sit amet sodales eros.
 Suspendisse fringilla accumsan mattis.".
- Button text**: A text input field containing the placeholder text "See more".
- Button link**: A text input field containing the placeholder text "##". Below the field is the note: "Button will appear only if this field will be filled.".
- Dark Background**: A toggle switch currently set to "OFF". To the right of the switch is the text: "Turn it ON if you uploaded dark background and you want light text color.".

- **Title** - main title for slide (you can use HTML tags here)
- **Text** - text placed under main title (you can use HTML also)
- **Button text** - if you want to have button for slide you can type button text here
- **Button link** - link for button (please start link always with **http://**)
- **Dark background** - if you uploaded dark background/featured image please turn this button on so you can have white text.
- **Featured image** - this option is not visible in Slide options section because it is default WordPress option and this option is next to Slide options section. This option is for slide image. Just click on *Set featured image* button and choose your own image for slide. Just really easy :)

If you want to set up this slider for specific page, then you can do it in *Page options* section when you edit/create page. Inside this section you have "Slider" option and all you need to do is select - **Muffin Slider** - option. This is everything.

All data (images, texts, etc...) for this slider comes with xml file and can be downloaded from <http://themes.muffingroup.com/xmls/>

We have one additional option for this slider and you can find it in *Theme options > Getting started > Sliders* section. There is option for **Muffin Slider timeout**.

3.2 Revolution Slider

3.2.1 Getting demo slider

In package downloaded from Themeforest you can find **slider-demo** folder that has included *uploads* folder and *slider1.txt* file. In first step please upload content from uploads folder to your *wp-content/uploads* folder. In next step you need to go to **Revolution Slider**, click button "Create new slider" and fill below fields:

Slider Title: Slider 1

Slider Alias: slide1

In next step please click "Create Slider" button.

On the list of available sliders, click on slider that you already created and in the bottom section you will see "Show Export / Import" link. After that you will get field to select file. You need to choose *slider1.txt* file in this step and click "Import Slider" button.

The screenshot displays the 'Edit Slider' interface for Revolution Slider. On the left is a sidebar with a menu including Dashboard, Posts, Media, Pages, Comments, Clients, Portfolio, Testimonials, Contact, Appearance, Plugins, Users, Tools, Settings, Thumbnail Gallery, and Revolution Slider (highlighted). The main content area is titled 'Edit Slider' and contains several panels. The 'Main Slider Settings' panel includes: Slider Title (Homepage slider), Slider Alias (slide1), Slider Shortcode ([rev_slider slide1]), Slider Layout (radio buttons for Fixed, Custom, Auto Responsive, Full Screen), and Grid Settings (Grid Width: 1200, Grid Height: 480). Below these are buttons for Update Slider, Delete Slider, Close, Edit Slides, and Preview Slider. The 'Import / Export' panel at the bottom features an 'Import Slider' section with a 'Browse...' button and 'Import Slider' button, and an 'Export Slider' section with an 'Export Slider' button. A note states: 'Note, that when you importing slider, it delete all the current slider settings and slides, then replace it with the new ones.' On the right side, there are several expandable panels: General Settings, Position, Appearance (with options for Shadow Type, Show Timer Line, Background color, Padding, Show Background Image, and Background Image Url), Navigation, Thumbnails, Mobile Visibility, Alternative First Slide, and Troubleshooting.

3.2.2 Slider management

After pressing the "*Create New Slider*" button you will reach a form where you are asked to enter a *Slider Title* (used for the Slider overview in this backend) and a *Slider Alias* (a slug that is used to implement the Slider in your WP later, so keep it simple with no spaces and special chars).

You are also prompted to enter the *Sliders Basic Settings*, a *Slider Title* (for you to remember the Slider by) and a *Slider Alias* (please do not use special characters or spaces here, this defines the shortcode for you to use in your content).

The options in the boxes on the right side (General Settings, Position, Appearance, Navigation, Thumbnails) have helping Tooltips on mouseover so they are not explained here.

The Slider Type can be fixed (not responsive, fix dimensions), responsive (changes depending on the size of its max. sizes given later in relation to the screen size) or fullwidth (always 100% in width of the screen size, but height keeping the aspect ratio).

The Sizes section is needed to fit the slider in all screen sizes needed. The height of the slider will always be calculated to keep the aspect ratio from the max width and height given in the Slider Size line.

The next step is creating/editing slides. You get there by just clicking on "*Edit Slides*" in the Slider Form window.

Just press "*New Slide*" and the native WP Media Upload dialog window will appear. Choose or Upload the slide's background image, choose "*Full Size*" and then "*Insert Into Post*" (all like you are used to it in your WP editor). You can always click on the pic to change it.

Use the arrow handles on the right side to change the slides position in the slider (top to bottom = first to last slide to be shown) or delete it with the "*Delete*" button.

The "*Edit Slide*" leads you to the next chapter "*Slide*".

In the "*Edit Slide*" view you see the heart of our plugin. The drag&drop Caption editor.

But first please note that you have another chance here to change the background image with the "*Change Image*" button.

To create a Layer (Caption, Image or Video) press the button "*Add Layer*" or "*Add Layer: Image*". In case of a text layer a basic layer will be created you can use the "*Text*" field in the Layer Params to change the caption on it. The "*Style*" selectbox shows some basic styles (CSS classes) you can use to style the caption (you can always add own CSS classes to this field or edit the existing ones via the "*Edit CSS File*").

In case of an Image Layer you will see the native WP Media Uploader again. In case of a Video Layer you will be prompted to a custom Video selection wizard.

You now can move the Layers around via drag&drop or type in the x and y coordinate in the corresponding fields.

The "*Layers Sorting*" drag&drop list determines the Layers' z-index. This list specifies the stack order of an element.

An element with greater stack order is always in front of an element with a lower stack order.

Please also note that slider is a plugin and whole documentation for this item you can find in *documentation/revolution-slider-documentation* folder in package downloaded from themeforest.

Remember: please set up chmod on 777 on below folders to show slider thumbnails and for possibility to edit CSS styles for slider in admin panel.

wp-content/plugins/revslider/cache
wp-content/plugins/revslider/rs-plugin/css

NOTE! In default Revolution Slider version included into theme you will get all our styles for plugin. After update plugin to newer version, please do not forget to copy slider styles from */revolution-slider-demo/captions.css* (this folder is included into TF package) to */wp-content/plugins/revslider/rs-plugin/css/captions.css*

4. Theme options panel

Theme options panel has been especially created to make your work faster and easier. Using it is very easy and in just a few minutes you can change a lot of things on your page.

4.1 Getting started

4.1.1 General

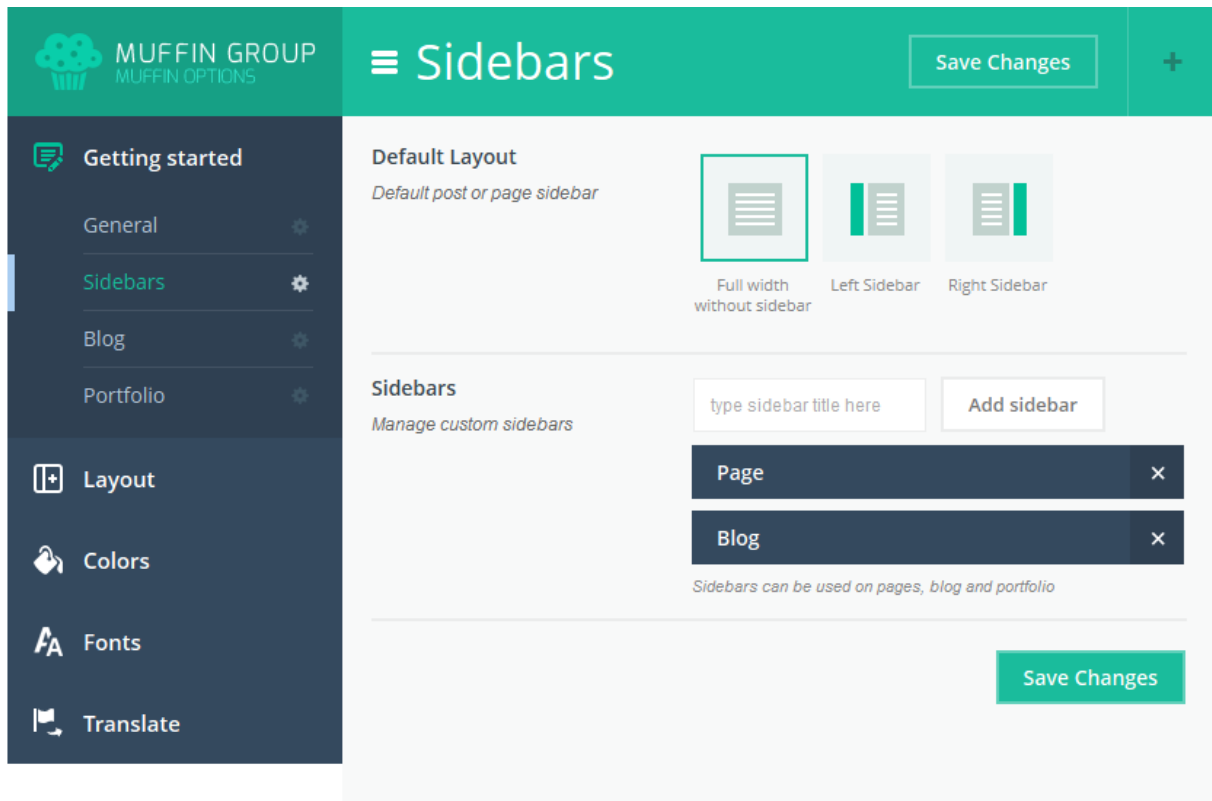

In this section you can set up some general options for your site. You can find here things like *Google Analytics*, *Responsive version*, etc. Please check below options available in this section:

- **Responsive** - choose if you want to use responsive version or not.
- **Use built-in SEO fields** - if you are using external SEO plugin you can easily turn off built-in SEO option.
- **Meta Description** - this is meta description for homepage but it's also default description for each page added in *Pages* section.
- **Meta Keywords** - this is meta keywords for homepage but it's also default keywords for each page added in *Pages* section.
- **Google Analytics** - paste your Google Analytics code to track your site.

The screenshot shows the 'General' settings panel for the Muffin Group theme. The panel has a teal header with the 'MUFFIN GROUP MUFFIN OPTIONS' logo on the left, a 'General' title in the center, and a 'Save Changes' button on the right. A dark sidebar on the left contains navigation links: 'Getting started', 'General' (selected), 'Sidebars', 'Blog', 'Portfolio', 'Layout', 'Colors', 'Fonts', and 'Translate'. The main content area is divided into sections: 'Responsive' (toggle ON), 'Use built-in SEO fields' (toggle ON), 'Meta Description' (text input: 'Just another WordPress site'), 'Meta Keywords' (text input), and 'Google Analytics' (text input for code). Each section has a 'Save Changes' button at the bottom right.

4.1.2 Sidebars

This is default option for pages and posts. Here you can set whether your post or page should have full width or maybe include a sidebar (left or right). For example when you choose *Left sidebar* each of your pages or post that you will create will have left sidebar. **Of course, this is only default option and while creating page or post you can set up your own layout.**

You can also manage your Sidebars here. You can add new and delete existing one.

Please always remember to click "*Save Changes*" button. Without that you will lose all your changes.

4.1.3 Blog

The screenshot shows the 'Blog' settings page in the Muffin Group Muffin Options interface. The interface has a teal header with the logo and 'MUFFIN GROUP MUFFIN OPTIONS' on the left, a 'Blog' title and 'Save Changes' button in the center, and a '+' icon on the right. A dark sidebar on the left contains navigation options: 'Getting started', 'General', 'Sidebars', 'Blog' (highlighted), and 'Portfolio'. The main content area is divided into sections: 'Posts per page' (input field with '6'), 'Layout' (four grid options: List, Grid Two columns, Grid Three columns, Grid Four columns), 'Show Categories' (ON), 'Show Comments' (ON), 'Show Date' (ON), 'Show Tags' (ON), 'Read more' (input field with 'Read more'), and 'All pages in pagination' (ON). A 'Save Changes' button is at the bottom right.

Here you can find some options for blog page. This is of course a default option for new pages. You have got the following options for blog:

- **Posts per page** - you can select how many posts should be on page.
- **Layout** - choose layout for blog that you like the most.
- **Show Categories** - this option will show categories on posts list and single post when it is on.
- **Show Comments** - this option will show comments number on posts list and single post when it is on.
- **Show Date** - this option will show date on posts list and single post when it is on.
- **Show Tags** - this option will show tags on posts list and single post when it is on.

- **Read more** - text for "Read more" link
- **All pages in pagination**- here you can choose if you want to show all of the pages insted of a short list of the pages near the current page.

All of this options except *Posts per page* can be changed for each post.

Please always remember to click "*Save Changes*" button. Without that you will lose all your changes.

4.1.4 Portfolio

The screenshot shows the 'Portfolio' settings page in the Muffin Group admin interface. The page is divided into a teal header, a dark sidebar, and a white main content area. The sidebar contains navigation links for 'Getting started', 'General', 'Sidebars', 'Blog', 'Portfolio' (which is highlighted), 'Layout', 'Colors', 'Fonts', and 'Translate'. The main content area is titled 'Portfolio' and includes a 'Save Changes' button in the top right. The settings are organized into sections: 'Posts per page' with an input field set to '8'; 'Layout' with four grid icons (List, Two columns, Three columns, Four columns); 'Portfolio Page' with a dropdown menu set to 'Portfolio'; 'Single item slug' with an input field set to 'portfolio-item' and a warning note; 'Order by' with a dropdown menu set to 'Date'; 'Order' with a dropdown menu set to 'Descending'; and 'jQuery filtering' with a toggle switch set to 'ON'. A teal 'Save Changes' button is located at the bottom right of the settings area.

This option will certainly be very helpful in creating your portfolio page. Here you can set the following options:

- **Posts per page** - this is the number of portfolio posts per page.
- **Layout** - you can choose what layout will be the best for your portfolio (one, two, three or four cols)

- **Portfolio page** - here you can select the right page for portfolio from list of all created pages. You need to choose a page for that because the theme applies info such a layout, sidebar and link to page in breadcrumbs.
- **Single item slug** - this is a link to single item. After changing that option please go to "*Settings > Permalinks*" and click "*Save changes*" button.
- **Order by** - you can select what should be used to sort your portfolio.
- **Order** - you can choose how your portfolio should be ordered (ascending or descending).
- **jQuery filtering** - you can choose if you want to filter portfolio items using jquery plugin to make your portfolio look much better.

Please always remember to click "*Save Changes*" button. Without that you will lose all your changes.

4.2 Layout

In this section you can set up some layout options such as social icons or logo.

4.2.1 General

The screenshot shows the 'General' settings page for the Muffin Group website. The interface is divided into a left sidebar and a main content area. The sidebar includes sections for 'Getting started', 'Layout', 'Colors', 'Fonts', and 'Translate'. The 'Layout' section is expanded, showing 'General', 'Header', 'Social Icons', and 'Custom CSS'. The main content area is titled 'General' and contains several settings:

- Use 960px grid:** A toggle switch is currently set to 'OFF'. A note says 'Turn it ON if you prefer narrow 960px grid.'
- Layout:** Under 'Layout type', there are two options: 'Boxed' (selected) and 'Full width'.
- Background Image:** A placeholder image with a geometric pattern is shown. Below it is a 'Remove Upload' button. A note states 'This option can be used *only* with Layout: Boxed.'
- Background Image position:** A dropdown menu is set to 'Center Repeat'. A note says 'This option can be used *only* with your custom image selected above.'
- Custom Favicon:** A 'Browse' button is present. A note says 'Please use ICO format only.'
- Footer Copyright Text:** An empty text input field. A note says 'Leave this field blank to show a default copyright.'

There are 'Save Changes' buttons at the top right and bottom right of the settings area.

This section is created for header. Here you can set up some options like:

- **Use 960px grid** - turn it on if you want 960px grid
- **Layout** - choose boxed or full width layout.
- **Background Image** - set up own background image
- **Background Image position** - choose position for your background image
- **Custom Favicon** - upload your own favicon

- **Footer Copyright Text** - if you want to get your own copyright text then please type it here.

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

4.2.2 Header

The screenshot shows the 'Header' settings panel for 'MUFFIN GROUP MUFFIN OPTIONS'. The panel includes a sidebar with navigation options: Getting started, Layout (with sub-options: General, Header, Social Icons, Custom CSS), Colors, Fonts, and Translate. The main content area contains settings for: Sticky Header (ON), Custom Logo (Browse), Retina Logo (Browse), Header Contact Text (Have any questions?), Header Phone number (+61383766284), Header E-mail (noreply@envato.com), and Vertical Slider - Timeout (0 milliseconds). A 'Save Changes' button is at the bottom right.

Here you can set up some options for logos, header and much more. Below we will describe all of them.

- **Sticky Header** - turn on/off sticky header
- **Custom Logo** - choose your custom logo image
- **Retina Logo** - choose your retina logo image (should be 2x larger than Custom Logo)
- **Header Contact Text** - text in header next to phone and email
- **Header Phone number** - type phone number for Header
- **Header E-mail** - type e-mail for Header
- **Vertical Slider - Timeout** - time in milliseconds between slide transitions

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

Save Changes

Here you can set up some options for social icons. Below we will describe all of them.

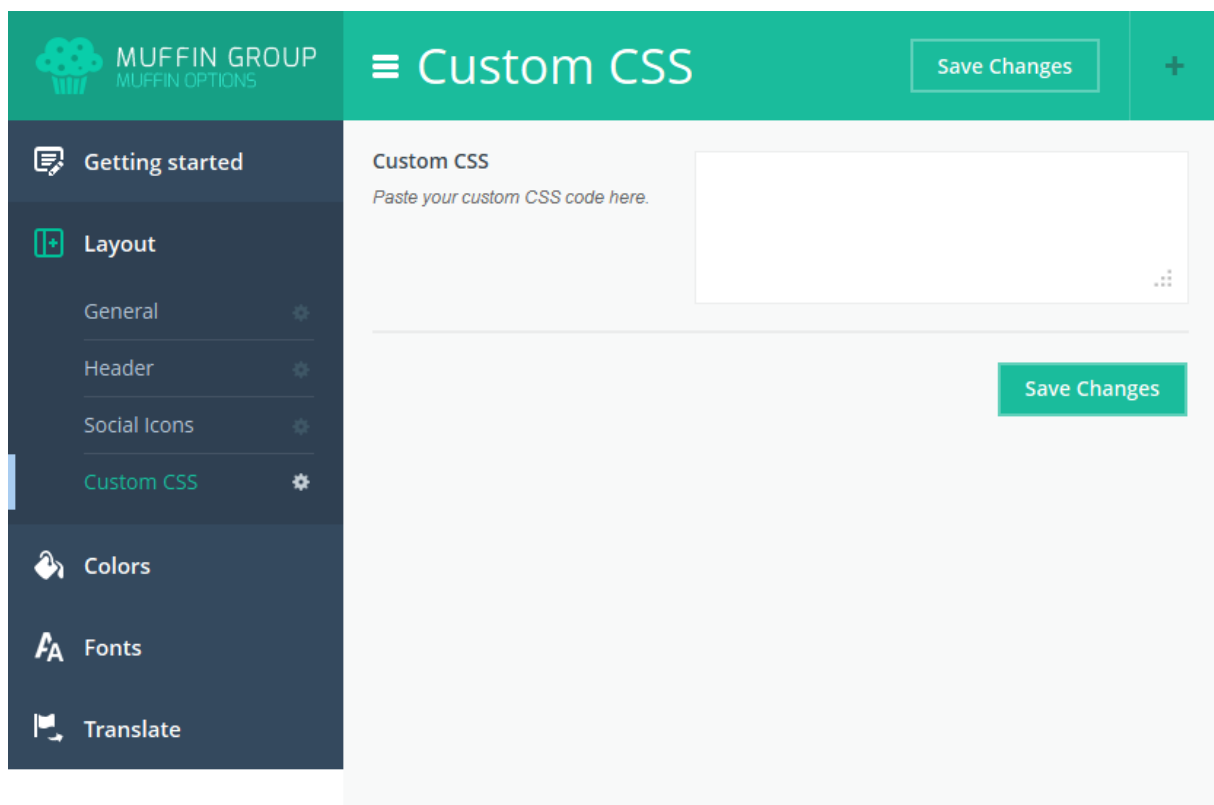

- **Facebook** - link to your facebook profile
- **Google +** - link to your Google + profile
- **Twitter** - link to your twitter profile

- **Vimeo** - link to your vimeo profile
- **YouTube** - link to your youtube profile
- **Flickr** - link to your flickr profile
- **LinkedIn** - link to your LinkedIn profile
- **Pinterest** - link to your Pinterest profile
- **Dribbble** - link to your Dribbble profile

If you leave empty field for social icons like facebook, twitter etc. **the icons will be not shown on the page.**

Please always remember to click *"Save Changes"* button. Without that you will lose all your changes.

4.2.4 Custom CSS

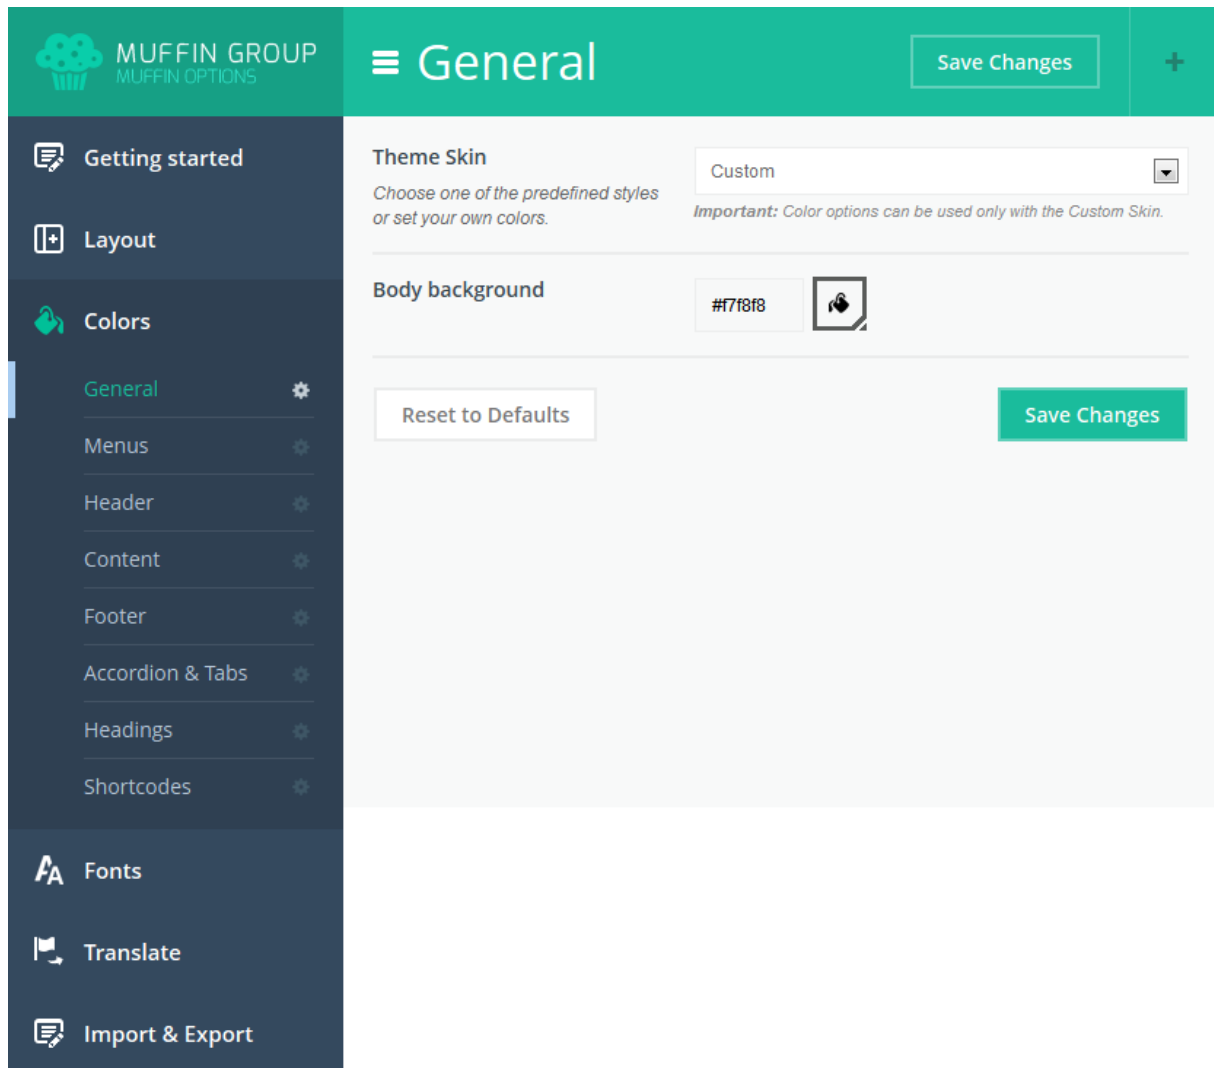

Here you can find only one field called **"Custom CSS"**. You can paste here your own css code for your page. Of a this field you don't need to make any changes in css files.

Please always remember to click *"Save Changes"* button. Without that you will lose all your changes.

4.3 Colors

This is probably the most powerful options section in theme options panel. Here you can set up any color for each part of your page. Just check how many options you can set up in our color section.

4.3.1 General

Only two options are available in this section.

- **Theme skin** - here you can choose one of the predefined styles or you can set your own colors. Please remember that color options can be used only with the Custom Skin.
- **Body background** - choose color for your background

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

4.3.2 Menus

The screenshot displays the 'Muffin Group Muffin Options' interface for configuring the 'Menu'. The sidebar on the left includes sections for 'Getting started', 'Layout', 'Colors', 'Fonts', 'Translate', and 'Import & Export'. The 'Colors' section is expanded, showing options for 'General', 'Menu', 'Header', 'Content', 'Footer', 'Accordion & Tabs', 'Headings', and 'Shortcodes'. The 'Menu' option is selected. The main panel, titled 'Menu', contains the following settings:

- Menu background:** #3D9BDC
- Menu Link color:** #ffffff
- Menu Hover Link background:** #53302e
- Menu Hover Link color:** #ffffff
- Submenu background:** #ffffff
- Submenu Link color:** #5f5f5f
- Submenu Hover Link color:** #2e2e2e
- Widget Muffin Menu Link color:** #737373
- Widget Muffin Menu Hover Link color:** #444444

At the bottom of the panel, there are 'Reset to Defaults' and 'Save Changes' buttons. A note for the widget settings states: 'To change icon please edit css/skins /.../images/links.png file.'

- **Menu background** - background color for menu section
- **Menu Link color** - color for links in menu
- **Menu Hover Link background** - hover background color for links in menu
- **Menu Hover Link color** - hover color for links in menu
- **Submenu background** - background color for submenu
- **Submenu Link color** - link color for submenu
- **Submenu Hover Link color** - link color for submenu on hover
- **Widget Muffin Menu Link color** - link color for muffin menu widget
- **Widget Muffin Menu Hover Link color** - link color for muffin menu widget on hover

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

4.3.5 Footer

The screenshot displays the 'Footer' settings page in the Muffin Group theme. The sidebar on the left lists various configuration categories, with 'Footer' currently selected. The main content area is titled 'Footer' and contains a list of settings, each with a color swatch and a lock icon:

- Border Top**: #f94c3f (Shaded Line above the footer)
- Text color**: #797b7f
- Link color**: #f94c3f
- Link Hover color**: #ac3d35
- Heading color**: #53302e
- Widget Title color**: #767676
- Icon color**: #937a79
- Note color**: #98a3ab
- Photo border**: #ffffbe

Buttons for 'Reset to Defaults' and 'Save Changes' are located at the bottom of the settings area.

- **Border Top** - color for shaded line above the footer
- **Text color** - text color for footer
- **Link color** - link color for footer

- **Link Hover color** - link color for footer on hover
- **Heading color** - heading color for footer
- **Widget Title color** - title color for widgets in footer
- **Icon color** - color for icons in footer
- **Note color** - color for note in footer
- **Photo border** - bor color for images in footer

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

4.3.6 Headings

The screenshot shows the 'Headings' settings page in the Muffin Group Muffin Options interface. The sidebar on the left contains navigation items: Getting started, Layout, Colors (with sub-items: General, Menus, Header, Content, Footer, Accordion & Tabs, Headings, Shortcodes), Fonts, Translate, and Import & Export. The main content area is titled 'Headings' and features a 'Save Changes' button in the top right corner. Below the title, there are six rows, each representing a heading level (H1 through H6). Each row includes a label (e.g., 'Heading H1 color'), a color picker showing the current color (hex code), and a 'Save Changes' button. The colors are: H1 (#39464e), H2 (#39464e), H3 (#39464e), H4 (#37414e), H5 (#37414e), and H6 (#37414e). At the bottom of the main content area, there are two buttons: 'Reset to Defaults' and 'Save Changes'.

- **Heading H1 color** - text color for h1 (Subpages header title font color)
- **Heading H2 color** - text color for h2
- **Heading H3 color** - text color for h3
- **Heading H4 color** - text color for h4
- **Heading H5 color** - text color for h5
- **Heading H6 color** - text color for h6

Please always remember to click "*Save Changes*" button. Without that you will lose all your changes.

4.4 Fonts

In this section you can set up fonts for your website. We divided this section on four blocks what you can see below.

4.4.1 Font Family

The screenshot shows the 'Font Family' settings page for Muffin Group. The page is divided into a teal header, a dark sidebar, and a main content area. The sidebar contains navigation options: 'Getting started', 'Layout', 'Colors', 'Fonts' (with 'Font Family' selected), and 'Translate'. The main content area is titled 'Font Family' and contains four sections: 'Content Font', 'Main Menu Font', 'Headings Font', and 'Google Font Subset'. Each section has a dropdown menu for font selection, all currently set to 'Raleway'. The 'Content Font' section has a description: 'This font will be used for all theme texts except headings and menu.' The 'Main Menu Font' section has a description: 'This font will be used for header menu.' The 'Headings Font' section has a description: 'This font will be used for all headings.' The 'Google Font Subset' section has a description: 'Specify which subsets should be downloaded. Multiple subsets should be separated with coma (,)'. It also includes a note: 'Some of the fonts in the Google Font Directory support multiple scripts (like Latin and Cyrillic for example). In order to specify which subsets should be downloaded the subset parameter should be appended to the URL. For a complete list of available fonts and font subsets please see [Google Web Fonts](#).' A 'Save Changes' button is located at the bottom right of the settings area.

- **Content Font** - this font will be used for all theme texts except *headings* and *menu*
- **Main Menu Font** - this font will be used for header menu
- **Headings Font** - this font will be used for all headings
- **Google Font Subset** - you can specify which subsets should be downloaded. Multiple subsets should be separated with coma (,)

You can choose your own font from a palette of **over 600 fonts**.

4.4.2 Font Size

The screenshot shows the 'Font Size' settings page in the Muffin Group Muffin Options interface. The page has a teal header with the Muffin Group logo and 'MUFFIN GROUP MUFFIN OPTIONS' text. A navigation menu on the left includes 'Getting started', 'Layout', 'Colors', 'Fonts', and 'Translate'. The 'Fonts' section is expanded, showing 'Font Family' and 'Font Size' (which is selected). The main content area is titled 'Font Size' and contains a 'Save Changes' button. Below the title, there are seven settings, each with a slider and a numeric input field:

Setting	Value
Content <i>This font size will be used for all theme texts.</i>	14
Main menu <i>This font size will be used for top level only.</i>	14
Heading H1 <i>Subpages header title.</i>	43
Heading H2	40
Heading H3	35
Heading H4	30
Heading H5	23
Heading H6	16

A 'Save Changes' button is located at the bottom right of the settings area.

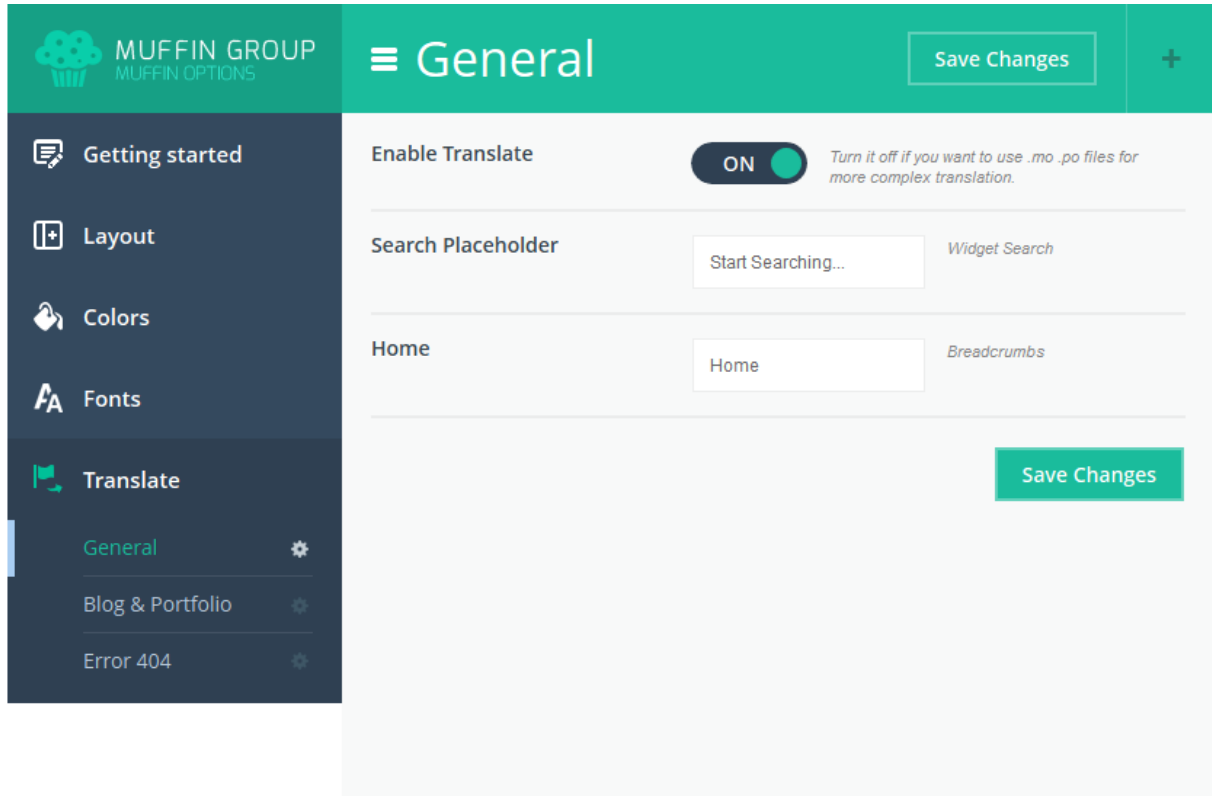

- **Content** - this font size will be used for all theme texts
- **Main menu** - this font will be used for top menu only
- **Heading H1** - this font will be used for h1 headings
- **Heading H2** - this font will be used for h2 headings
- **Heading H3** - this font will be used for h3 headings
- **Heading H4** - this font will be used for h4 headings
- **Heading H5** - this font will be used for h5 headings
- **Heading H6** - this font will be used for h6 headings

You can select the font size of the range **1-70**.

4.5 Translate

Translating the most important sections on the page has never been so easy.

4.5.1 General

It depends how you want translate your theme. If you don't want to translate using .mo and .po files you can do it easily in this section.

- **Enable Translate** - you can turn it off if you want to use .mo/.po files for more complex translation.
- **Search Placeholder** - here you can set up placeholder text for *Header* and *Widget Search*
- **Home** - here you can set up breadcrumbs text

4.5.2 Blog & Portfolio

**MUFFIN GROUP**
MUFFIN OPTIONS

Blog & Portfolio

- Getting started
- Layout
- Colors
- Fonts
- Translate**
 - General
 - Blog & Portfolio**
 - Error 404

Comment *Blog*
Text to display when there is one comment

Comments *Blog*
Text to display when there are more than one comments

Comments off *Blog*
Text to display when comments are disabled

Previous post *Single Post*

Next post *Single Post*

Select category *Portfolio*

All *Portfolio*

Project details *Single Portfolio*

Category *Portfolio*

Client *Portfolio*

Date *Portfolio*

Task *Portfolio*

Website *Portfolio*

Visit online *Portfolio*

This is area where you can set up some texts for your portfolio and blog page.

- **Comment** - text to display when is only one comment
- **Comments** - text to display when is more than one comment
- **Comments off** - text to display when comments are disabled
- **Previous post** - text on single blog page
- **Next post** - text on single blog page
- **Select category** - text available on portfolio page
- **All** - text available on portfolio page
- **Project details** - text available on single portfolio page
- **Category** - text available on blog & single portfolio page
- **Client** - text available on single portfolio page
- **Date** - text available on single portfolio page
- **Task** - text available on single portfolio page
- **Website** - text available on single portfolio page
- **Visit online** - text available on single portfolio page

4.5.3 Error 404

The screenshot shows the configuration interface for the Error 404 page. The top header is green and contains the Muffin Group logo, the text 'MUFFIN GROUP MUFFIN OPTIONS', a hamburger menu icon, the title 'Error 404', a 'Save Changes' button, and a plus sign. On the left is a dark sidebar with navigation options: 'Getting started', 'Layout', 'Colors', 'Fonts', 'Translate', 'General', 'Blog & Portfolio', and 'Error 404' (which is highlighted). The main content area is white and contains four sections for configuration: 'Title' with a text input field containing 'Oops... Error 404' and a preview below; 'Subtitle' with a text input field containing 'We're sorry, but the page you are looking for doesn't exist.' and a preview below; 'Text' with a text input field containing 'Please check entered address and try again or' and a preview below; and 'Button' with a text input field containing 'go to homepage' and a preview below. A 'Save Changes' button is located at the bottom right of the configuration area.

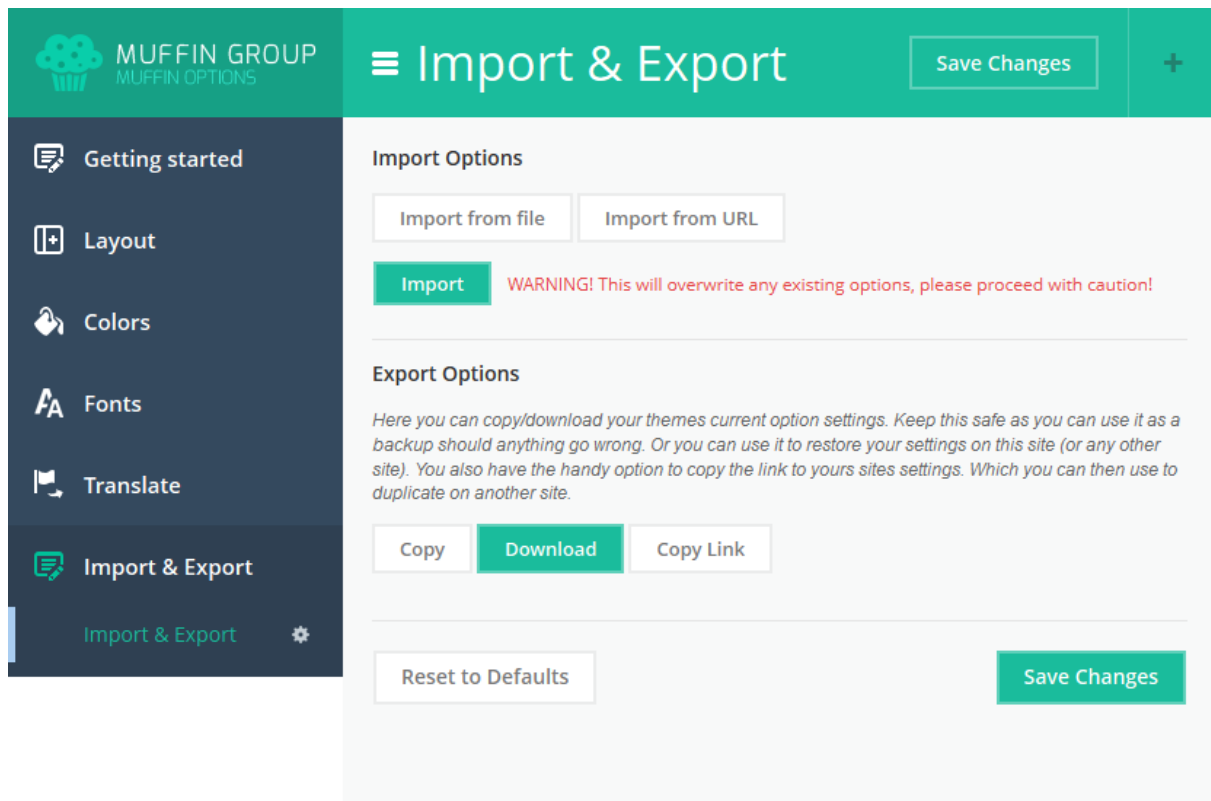

Now your **Error 404** page is 100% configurable. You can set up here below options:

- **Title** - this is title for error 404 page
- **Subtitle** - this is subtitle for error 404 page
- **Text** - text message for error 404 page
- **Button** - this is text for button on error 404 page

For each fields you can set up your own text.

4.6 Import & Export

This section is especially for all those who want to move settings from theme options panel between themes or when you move your website from test server to live. You have few different ways to import or export settings what you can see on image below:

You can also Reset settings from this section to default if you want so your theme will look like on our demo version.

5. Shortcodes

As you know, shortcodes are really useful in creating pages, and they accelerate your work. That's the main reason why have created them. Below you'll learn how to use them in the "Brandon" theme. There is a lot of them and they are easy to use.

5.1 Adding shortcodes in content using wp-editor

You can use shortcodes directly in WP editor. Just click on green circle button with plus inside. After that you'll see whole list of shortcodes. After select right shortcode and click "Insert", the shortcode will be inserted into editor.

5.2 List of available shortcodes & how to use them

1) Buttons - as name indicates, these are the buttons to use on pages. Attributes for buttons are:

- **link** (link to other page)
- **title** (title for button)
- **target** (optional target for link, ex. "_blank")
- **size** (optional size of button - "normal" is default, you can also choose "small" or "large")
- **color** (color for text - as in background color you can use name of color, ex. "white" or hex ex. "#FFFFFF")
- **class** - this option is useful when you want to use **prettyPhoto**

Below you can see the example of buttons shortcode:

```
[button link="http://muffingroup.com" target="_blank" title="Muffin group" size="large" color="orange" class="iframe"]
```

Preview:

For more info and demo please go to [buttons shortcode demo](#)

2) Divider - This item is creating space between elements. It is also aligning for a single line, boxes located underneath.

Divider shortcode has got 2 attributes:

- **height** - enter the amount of the divider height (in px)
- **line** - type 1 if you want to show line, 0 if you don't want

Example of this shortcode below:

```
[divider height="30" line="1"]
```

For more info and demo please go to [divider shortcode demo](#)

3) Ico - this is a very useful option for embedding icons into page. This option has got just one attribute:

- **type** (type of icon)

Below you can see some examples of this shortcode:

```
[ico type="fa-phone"]  
  
[ico type="fa-flickr"]
```

For more info and demo please go to [ico shortcode demo](#)

4) Image - this is a very useful option for embedding images into page. This option has got a long list of available attributes:

- **src** (url to image)
- **align** (optional alignment for image) - available values: none (default), left, right, center
- **caption** (optional) - text available under the image
- **link** (optional) - link for larger image or other page
- **link_type** (optional) - type of link can be chosen from 2 values available:
- **target** (optional, works only with "details" link_type) - link target, available value: "_blank" (open in new window)
- **alt** (optional) - alternative text for image

Below you can see some examples of this shortcode:

```
[image src="" link="" align="left" caption="Align left with caption and  
lightbox"]  
  
[image src="" link="" link_type="details" target="_blank" align="right"  
caption="Align right with caption <br /> and link to details <br /> open in  
new window"]  
  
[image src="" align="center"]
```

For more info and demo please go to [image shortcode demo](#)

5) Lists - great tool when you want to present something within the list. We prepared 11 types of lists. Below you can check all of them:

Unordered bullet list

```
<ul class="list">
<li>List item 1</li>
<li>List item 2</li>
</ul>
```

Ordered list

```
<ol class="list">
<li>List item 1</li>
<li>List item 2</li>
</ol>
```

Roman ordered list

```
<ol class="list list_roman">
<li>List item 1</li>
<li>List item 2</li>
</ol>
```

Alpha ordered list

```
<ol class="list list_alpha">
<li>List item 1</li>
<li>List item 2</li>
</ol>
```

Unordered tick list

```
<ul class="list list_tick">
<li>List item 1</li>
<li>List item 2</li>
</ul>
```

Unordered info list

```
<ul class="list list_info">
<li>List item 1</li>
<li>List item 2</li>
</ul>
```

Unordered warning list

```
<ul class="list list_warning">
<li>List item 1</li>
<li>List item 2</li>
</ul>
```

Unordered plus list

```
<ul class="list list_plus">
<li>List item 1</li>
<li>List item 2</li>
</ul>
```

Unordered minus list

```
<ul class="list list_minus">
<li>List item 1</li>
<li>List item 2</li>
</ul>
```

Unordered arrow list

```
<ul class="list list_arrow">
<li>List item 1</li>
<li>List item 2</li>
</ul>
```

Unordered help list

```
<ul class="list list_help">
<li>List item 1</li>
<li>List item 2</li>
</ul>
```

As you can see, all of these lists have only a different kind of class. So if you want to change type of the list, you can easily do so by just changing the name of class..

For more info and demo please go to [lists shortcode demo](#)

6) Vimeo - this shortcode is for embadding vimeo videos on your page.

Vimeo video shortcode has got 3 attributes:

- **video** - vimeo video`s ID. This value is placed at the end of every vimeo video after last "/", for example: <http://vimeo.com/19819283>
- **width** - player`s width, 700 is highly recommended for left or right sidebar template while 950 for a default one.
- **height** - video player`s height

Example of this shortcode below:

```
[vimeo video="1084537" width="700" height="400"]
```

For more info and demo please go to [video shortcode demo](#)

7) Youtube - this shortcode is for embadding youtube videos on your page.

Youtube video shortcode have got 3 attributes:

- **video** - youtube video`s ID. This value is placed at the end of every video after "v=" parameter, for example: <http://www.youtube.com/watch?v=YE7Vz1Ltp-4>
- **width** - player`s width, 700 is highly recommended for left or right sidebar template while 950 for a default one.
- **height** - video player`s height

Example of this shortcode below:

```
[youtube video="YE7Vz1Ltp-4" width="700" height="420"]
```

For more info and demo please go to [video shortcode demo](#)

6. Blog

To create a blog please create a new page *Pages > Add New* and set up the title eg. *Blog*. In field *Template* leave default option on *Default Template*. In bottom section you will find *Page options* such as *Layout* and *Sidebar*. As you probably have guessed, you can choose whether your blog should be on full width or whether you want it with the sidebar (left or right). If you want blog with the sidebar you should also select the right sidebar for your page. You can also add video for each post. In section *Post option*, under the *Visual/HTML* default editor you have some options to set. In this section you can set up **Vimeo** or **Youtube** video.

At the end please click *Publish* button on the right.

In the next step please go to *Settings > Reading > Front page displays > A static page > Posts page*, select page that you have already created and click *Save changes*.

We have created some features specifically for bloggers. You will find them in *Theme options panel > Getting started > Blog*. These options are set on default for each new post. Full description of options for blog can be found in section **Theme Options (section 4.1.3)**

Adding new posts works similar to standard WordPress *Posts > Add New*. Posts will be displayed on the already created page.

Images for posts we can add using *featured image*.

For more info about post creation please go to <http://en.support.wordpress.com/posts/>. You can also check the movie about how to create a post <http://www.youtube.com/watch?v=Sa4uimrgNz8>

7. Portfolio

To create a portfolio please start by creating a new page *Pages > Add New* and setting up the title eg. *Portfolio*. In field *Template* set the option *Portfolio template*. In the bottom section you also have *Page options* such as *Layout* and *Sidebar*. As you have probably guessed, you can select whether your portfolio should be in full width or whether it should be with a sidebar (left or right). If you decide on the portfolio with a sidebar you should also select the right sidebar for your page.

In *Portfolio* section you can also add videos from **Vimeo** or **Youtube** for each portfolio item. Please don't forget set up featured image for portfolio item when you are adding video.

We have created some options for *Portfolio page*. You can find them in *Theme options panel > Getting started > Portfolio*. More info about these options can be found in **Theme options panel (section 4.1.4)**.

Portfolio items are working just like typical post. To add a new portfolio please go to *Portfolio > Add new*. As you can see you choose similar options as for a blog. Additionally, in the bottom section of the page you have *Page options*. Here you can choose whether you want a full width portfolio or the one with a sidebar (left or right).

When you choose the option with a sidebar **please don't forget to select the right sidebar** for this page.

You can also type *Excerpt* and select *Featured image*. After that please just click *Publish* button.

8. Menu creation

Menu creation works as in default Wordpress.

To add your own menus go to *Appearance > Menus*, type *Name* for your menu and click *Create Menu*. In next step, in section *Theme Locations* for position *Main menu* you need to choose a menu that you've just created.

Now you can add *Pages*, *Posts* and *Custom Links* from blocks located on the left. At the end you need to save it by clicking on *Save Menu*.

For more info about the menu creation please go to <http://en.support.wordpress.com/menus>

With this theme we also created Mega Menu option so you can create nice menus with items in columns with titles or without. If you want to create mega menu as we did for "Shortcodes" section on our demo, then it should be done as on below image:

For mega menu columns you must add menu item with # "URL" attribute and - as "Navigation label" value. Under this empty columns you can add right menu items.

But if you want columns with "Titles" at the top, then instead of - you must type own value.

9. Images

For this theme we used some images & icons available on the web.

List of used images you can find below:

Portfolio & Gallery

10. SEO

In the era of what is happening in the search engines (especially *Google*) we implemented SEO option in our theme. We hope this will be very helpful for all of you.

To set up general options for SEO please go to *Theme options panel > Getting started > General* . You can set up here things like *Meta Description* or *Meta Keywords* for homepage (this is also default option for each new page).

If you are using *external SEO plugin* you can easily turn it off.

Of course you can also set up options like *Title*, *Meta Description* and *Meta Keywords* for each page in this theme. You can do it in *Pages > Add page > Page options*.

In section *Page Options* you can find fields like **SEO Title**, **SEO Description** and **SEO Keywords**. If you fill these fields, the page will adopt this values. If you leave this fields empty, the page will adopt default values that are in *Theme options panel > Getting started > General*.

11. Support & contact with us

You can contact us in few ways. It depends on what you exactly need.

- **If you have got a questions about theme**, please place your question on forum <http://forum.muffingroup.com/brandon> . Please note that we won't answer support question in comments or emails - we prefer to provide you with support on forum because your question can be helpful to other customers.

- Via comments you can send only presale questions or comment that is not related to support.
- **If you have a really big problem and really need to give us access to your account** (that is personal and can only be used by support) you can contact us by using contact form on **our profile`s page on Themeforest** <http://themeforest.net/user/muffingroup> - in right bottom section of page.

There is no other way contact with us. So **please don`t contact us by sending message on youtube, facebook or twitter** - because it`s really difficult for us to control, your question could be lost in these communication channels.

12. XML file with demo content

The image shows a dark blue background with a white form titled "Get your .xml file". The form consists of three stacked input fields. The first is a dropdown menu with a person icon and the text "What for do you need XML file?". The second is a text input field with a person icon and the text "Enter Your Themeforest username". The third is a text input field with a document icon and the text "Enter Themeforest purchase code". Below the third field is a link "How to get purchase code?" and a green button labeled "Download".

To **download the XML file with demo content** please at first go to page: <http://themes.muffingroup.com/xmls/>

In next step please select a product for which you need xml file (in this case please choose **Brandon**). Please also paste your *themeforest username* and *purchase code*. Afterwards simply click "*Download*" and your file should start downloading.

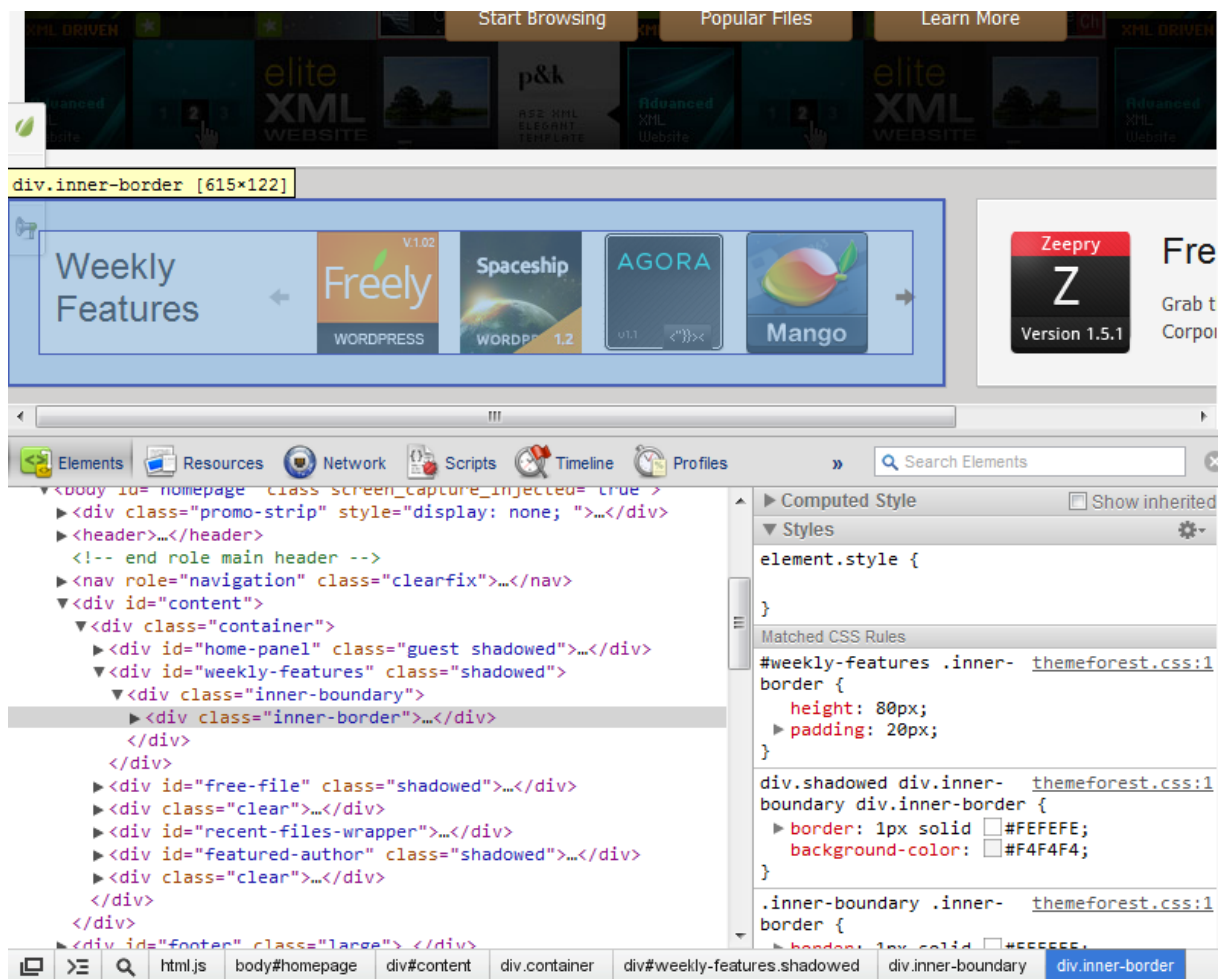

When you get this file onto your computer, you can import it into your wordpress (please import this file only after installing **Brandon theme**). This video (<http://www.youtube.com/watch?v=ohKx65P2HNU>) will show you how to import this file properly.

13. Advanced theme customization

Sometimes there is a moment when you want to change something on your site that is not available in theme options panel. Something like: font size, color, margin or any other customization. You don't have to ask us about all these things and wait for our response ever again. You can succeed in doing it on your own.

13.1 Google Chrome

To do it you can use two best tools available for free in your web browser. If you're using **Google Chrome** you can inspect element that you need to change by "Inspect element". To do it just hover mouse on element and click "Inspect element". After that you'll see something like on screen below:

As you can see on the image, on the left side there is a list of styles used for each class/id. If you want to change something, you can edit it on the screen and see how the elements look like. If everything is good and you want to make the same changes on your site please copy right styles from box of right side, for example:

```
#weekly-features .inner-border {

    height: 80px;
    padding: 20px;

}
```

and paste this code into: *Theme options > Styles > Custom CSS code*. If you want to paste this code instead of Custom CSS code you can do it in *custom.css* file. The result will be identical. It's up to you to decide on which way to use.

13.2 Firebug for Firefox

Apart from Google Chrome, we also suggest to use **Firebug for Firefox**. In contrast to Google Chrome, Firebug must be installed at first before you can use it. To do so please click **Firefox in the left top corner > Add-ons** and then search for Firebug and install it. When you get it into your browser you can use it the same way as with Google Chrome but instead of clicking "*Inspect element*" please click "*Inspect element with Firebug*". On the screen below you can see that it will look very similar to Inspect element in Google Chrome.

As you can see on image, on the left side there is a list of styles used for each class/id. If you want to change anything you can edit it on the screen and check what elements look like. If everything is good and you want to make the same changes on your site please copy right styles from box of right side, for example:

```
#weekly-features .inner-border {  
  
    height: 80px;  
    padding: 20px;  
  
}
```

and paste this code into: *Theme options > Styles > Custom CSS code*. If you want to paste this code instead of Custom CSS code you can do it in *style.css* file. The result will be identical. It's up to you to decide on which way to use.

As you can see, it's not difficult to use it and with the support of this tool you can save a lot of time, so we encourage you to try to do it as described and enjoy your new skills.
