1. General info & Installation

1.1 Few words on start

Our new theme called "**Caffeine**" is especially delivered for all those who prefer to manage all elements on the page. Here you will find things like content builder, shortcodes or detailed theme options panel. Be sure that with our new theme you can easily customize whatever you want on your page. Please also note that all this options are amazingly easy to use.

1.2 Package from themeforest

At first, after purchasing this theme please download the package from Themeforest. All you need to do that is move your mouse over your login name **in right top corner** (of course after you're logged in Themeforest) and then click **Download**. Here you will find all the items that you have purchased. It looks exactly just as the diagram below:

In the next step click the **Download** button next to Caffeine theme and save package on your computer.

In the package you can find you can find things like *documentation, license, psd files, zipped file with theme files* and folder with theme files called **Caffeine**. Please unpack the whole package after downloading it from Themeforest.

1.3 How to install & update it?

At first please make sure that you have unpacked the whole package shown in the last point. **This is very important!** You can complete instalation in two different ways:

1. **WordPress Theme Manager** - plase go to **Appearance > Themes > Install Themes > Upload**, select zipped theme folder called "caffeine.zip" and press *Install Now* button. The wordpress will do the rest for you.
2. **FTP upload** - upload non-zipped theme folder called *caffeine* to */wp-content/themes/* folder in your WordPress installation folder on your server.

In the second part of this guide we have described how to update Caffeine. Please make sure that you didn't make any changes in the files. If you have made changes and you don't want to lose them, the best way is to use one of freeware tools for comparing files, ex. [Beyond Compare](#) (we are not the authors of this tool so please don't ask us how to use it. Answers to how to use it can be found on their website). After comparing these files you can upload on server only the file that hasn't been changed.

If you haven't changed any theme files, all you need to do is update your version of theme by downloading the latest package from themeforest, unpacking files and uploading new files on the server while replacing the old files. Simply overwrite them.

All your data in the database are safe because after updating theme files doesn't change anything in the database. Please however always make a backup of your files & database.

2. Page creation

Creating your own page has been never so easy. To make the first step please go to *Pages > Add new*. On first sight everything looks just like in default wordpress. But when you have a look under *Visual/HTML* area you will see some *Page options*.

2.1 Getting started

The screenshot shows the 'Page Options' panel in a WordPress editor. It is divided into several sections:

- Content builder:** Features a dropdown menu set to 'Portfolio' and an 'Add item' button. Below it, a note says 'Choose an element and click the Add Item button'. A visual representation shows three content items: 'Accordion' (1/2), 'Blockquote' (1/2), and 'Divider' (1/1).
- Show the content:** Includes a toggle switch currently set to 'On'. A note explains: 'Turn it off if you build content using Content Builder. (Use the Content item if you want to display the Content from editor within the Content Builder)'. Below this is the text 'Show the content from the WordPress editor.'
- Layout:** Contains three icons representing different page layouts: 'Full width. No sidebar', 'Left Sidebar', and 'Right Sidebar'. Below the icons is the text 'Select layout for this page' and a placeholder 'Lorem ipsum dolor sit amet, consectetur adipiscing elit.'
- Sidebar:** Features a dropdown menu set to 'Sidebar'. Below it is the text 'Select sidebar for this page' and a note: 'Shows only if layout with sidebar is selected.'

In first *Visual/HTML* area you can build your page using all available options in editor. Beyond the default options we included green button called "*Insert shortcode*". With this option you can build any page you want based on shortcodes. All available shortcodes for this theme has been described in section **Shortcodes (section 5)**.

Please note that you can build page based not only on shortcodes. You can also use Content Builder (section 2.2).

Below the **Content Builder** you can find some *Page Options*.

- **Show the content** - this options will show the content from Wordpress editor. You can turn this button on or off. If you`re using Content Builder for building content please turn this button off. If you won`t turn it off, the content from Wordpress editor will show above the Content Builder items.

- **Layout** - you can choose personal layout for each page. There is 3 options to choose: full width without sidebar, left sidebar or right sidebar.
- **Sidebar** - here you can select proper sidebar for this page (of course if in the previous option you have selected right or left sidebar). You can create your own sidebars in *Appearance > Caffeine > Getting started > Sidebars*.
- **SEO Title** - title for page (if you leave this field empty, page will get default settings from *Theme options panel > Getting started > General*)
- **SEO Description** - description for page (if you leave this field empty, page will get default settings from *Theme options panel > Getting started > General*)
- **SEO Keywords** - keywords for page (if you leave this field empty, page will get default settings from *Theme options panel > Getting started > General*)

After set up all this options on right side you can choose right Page Template (section 2.3) for this site.

2.2. Content Builder

What about **Content Builder**? With his help web development is child's play. At first please choose an item that you need on page.

Afterward select one of the items please click *Add item* button. After that you will see the right Item already added below. You can do few things with this added Item.

- Expand Item to 1/4, 1/3, 1/2, 2/3, 3/4, 1/1 by using "+" button in the Item. The same way you can shorten this Item using "-" button. Please note that not all Items working with all sizes.
- You can delete Item if you don't need it by × in right Item corner.
- You can edit each Item by click on "pencil" in right bottom corner in the Item.
- You can also move any Item by drag & drop.

Please remember that Content Builer is working only with *Default template* and *Homepage* template.

You can choose one below items:

a) Accordion

If you want to add new slide into your theme please go to *Slides > Add new*. As you can see there are a lot of options. We will explain each of them step by step:

- The first input is the main (largest) text for slide

Below this large input there are *Slide Options*:

- **Slogan** - call to action text above the title of slide
- **Text** - text content on slide
- **Button text** - text on the button (button will appear only if this field is not empty)
- **Button link** - link for the button (button will appear only if this field is not empty)

You also need to set *featured image* that can be set up on the right side. After that just click "*Publish*" button.

Remember that you can add as many slides as you want.

3.2 What options are available?

You can set up some options for slider to adjust it to your needs. To do it please go to *Theme options > Getting started > Slider*. For more info about slider options please go to *Appearance > Caffeine > Getting started > Slider* (section 4.1.1)

3.3 Revolution slider (since 1.3 version).

Getting demo slider

In package downloaded from Themeforest you can find **slider-demo** folder that has included *uploads* folder and *slider1.txt* file. In first step please upload content from uploads folder to your *wp-content/uploads* folder. In next step you need to go to **Revolution Slider**, click button "Create new slider" and fill below fields:

Slider Title: Slider 1

Slider Alias: slide1

In next step please click "Create Slider" button.

On list of available sliders, click on slider that you already created and in the bottom section you will see "Show Export / Import" link. After that you will get field to select file. You need to choose *slider1.txt* file in this step and click "Import Slider" button.

Slider management

After pressing the "Create New Slider" button you will reach a form where you are asked to enter a *Slider Title* (used for the Slider overview in this backend) and a *Slider Alias* (a slug that is used to implement the Slider in your WP later, so keep it simple with no spaces and special chars).

You are also prompted to enter the *Sliders Basic Settings*, a *Slider Title* (for you to remember the Slider by) and a *Slider Alias* (please do not use special characters or spaces here, this defines the shortcode for you to use in your content).

The options in the boxes on the right side (General Settings, Position, Appearance, Navigation, Thumbnails) have helping Tooltips on mouseover so they are not explained here.

The Slider Type can be fixed (not responsive, fix dimensions), responsive (changes depending on the size of its max. sizes given later in relation to the screen size) or fullwidth (always 100% in width of the screen size, but height keeping the aspect ratio).

The Sizes section is needed to fit the slider in all screen sizes needed. The height of the slider will always be calculated to keep the aspect ratio from the max width and height given in the Slider Size line.

The next step is creating/editing slides. You get there by just clicking on "*Edit Slides*" in the Slider Form window.

Just press "*New Slide*" and the native WP Media Upload dialog window will appear. Choose or Upload the slide's background image, choose "*Full Size*" and then "*Insert Into Post*" (all like you are used to it in your WP editor). You can always click on the pic to change it.

Use the arrow handles on the right side to change the slides position in the slider (top to bottom = first to last slide to be shown) or delete it with the "*Delete*" button.

The "*Edit Slide*" leads you to the next chapter "*Slide*".

In the "*Edit Slide*" view you see the heart of our plugin. The drag&drop Caption editor.

But first please note that you have another chance here to change the background image with the "*Change Image*" button.

To create a Layer (Caption, Image or Video) press the button "*Add Layer*" or "*Add Layer: Image*". In case of a text layer a basic layer will be created you can use the "*Text*" field in the Layer Params to change the caption on it. The "*Style*" selectbox shows some basic styles (CSS classes) you can use to style the caption (you can always add own CSS classes to this field or edit the existing ones via the "*Edit CSS File*").

In case of an Image Layer you will see the native WP Media Uploader again. In case of a Video Layer you will be prompted to a custom Video selection wizard.

You now can move the Layers around via drag&drop or type in the x and y coordinate in the corresponding fields.

The "*Layers Sorting*" drag&drop list determines the Layers' z-index. This list specifies the stack order of an element.

An element with greater stack order is always in front of an element with a lower stack order.

Please also note that slider is a plugin and whole documentation for this item you can find in *documentation/revolution-slider-documentation* folder in package downloaded from themeforest.

Remember: please set up chmod on 777 on below folders to show slider thumbnails and for possibility to edit CSS styles for slider in admin panel.

revslider\rs-plugin\css

4. Theme options panel

Theme options panel has been especially created to make your work faster and easier. Using it is very easy and in just a few minutes you can change a lot of things on your page.

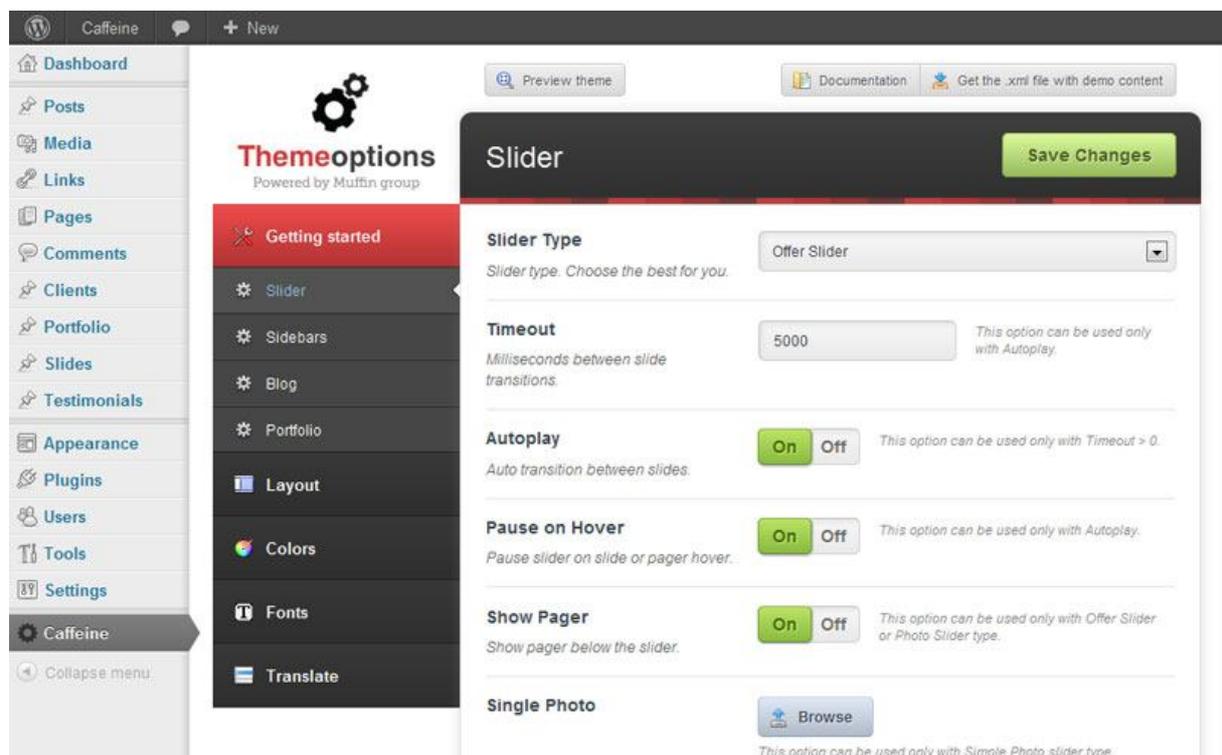

4.1 Getting started

4.1.1 General

In this section you can set up some general options for your site. You can find here things like *Google Analytics*, *Google Maps*, etc. Please check below options available in this section:

- **Contact E-mail** - the email address, you put here, will be used in Contact Form.
- **Google Maps Lat, Lng** - Google maps pointer position. You need to separate with comma, ex. "-33.8710, 151.2039".
- **Use built-in SEO fields** - if you are using external SEO plugin you can easily turn off built-in SEO option.
- **Meta Description** - this is meta description for homepage but it's also default description for each page added in *Pages* section.
- **Meta Keywords** - this is meta keywords for homepage but it's also default keywords for each page added in *Pages* section.
- **Google Analytics** - paste your Google Analytics code to track your site.

4.1.2 Slider

The screenshot shows the WordPress dashboard for a site named 'Caffeine'. The left sidebar contains various menu items, with 'Caffeine' selected. The main content area displays the 'Themeoptions' panel, powered by the Muffin group. The 'Slider' settings are currently active, showing a 'Save Changes' button in the top right corner. The settings include:

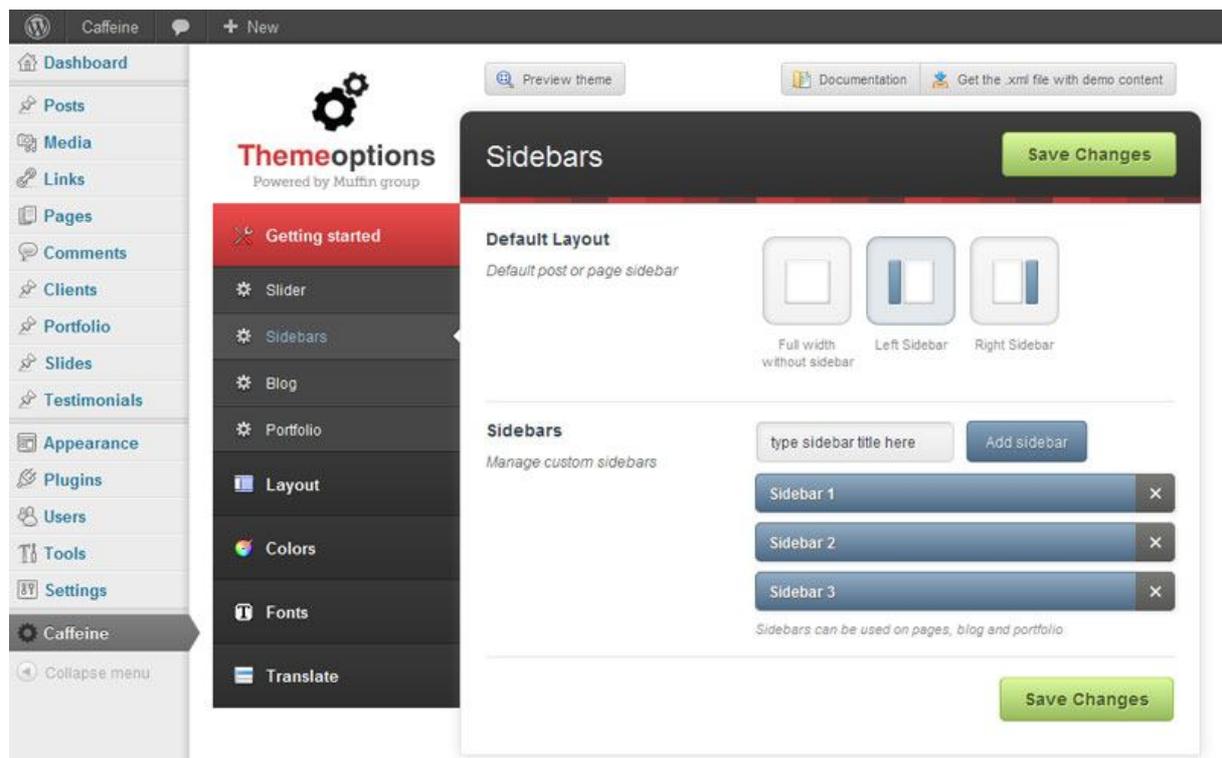

- Slider Type:** A dropdown menu set to 'Offer Slider'.
- Timeout:** A text input field set to '5000', with a note: 'This option can be used only with Autoplay.'
- Autoplay:** A toggle switch set to 'On', with a note: 'This option can be used only with Timeout > 0.'
- Pause on Hover:** A toggle switch set to 'On', with a note: 'This option can be used only with Autoplay.'
- Show Pager:** A toggle switch set to 'On', with a note: 'This option can be used only with Offer Slider or Photo Slider type.'
- Single Photo:** A 'Browse' button, with a note: 'This option can be used only with Simple Photo slider type.'

You can set below options:

- **Slider Type** - here you can choose one of three types (offer slider or photo slider)
- **Show Pager** - show pager under the slider. This option works only with *offer slider* and *photo slider* option.
- **Autoplay** - autoplay between the slides (this option works only when timeout is greather that 0)
- **Pause on click** - pause slider on pager click (this option works only with *autoplay*)
- **Timeout** - time in miliseconds between the slides transition (this option works only with *autoplay*)

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

4.1.3 Sidebars

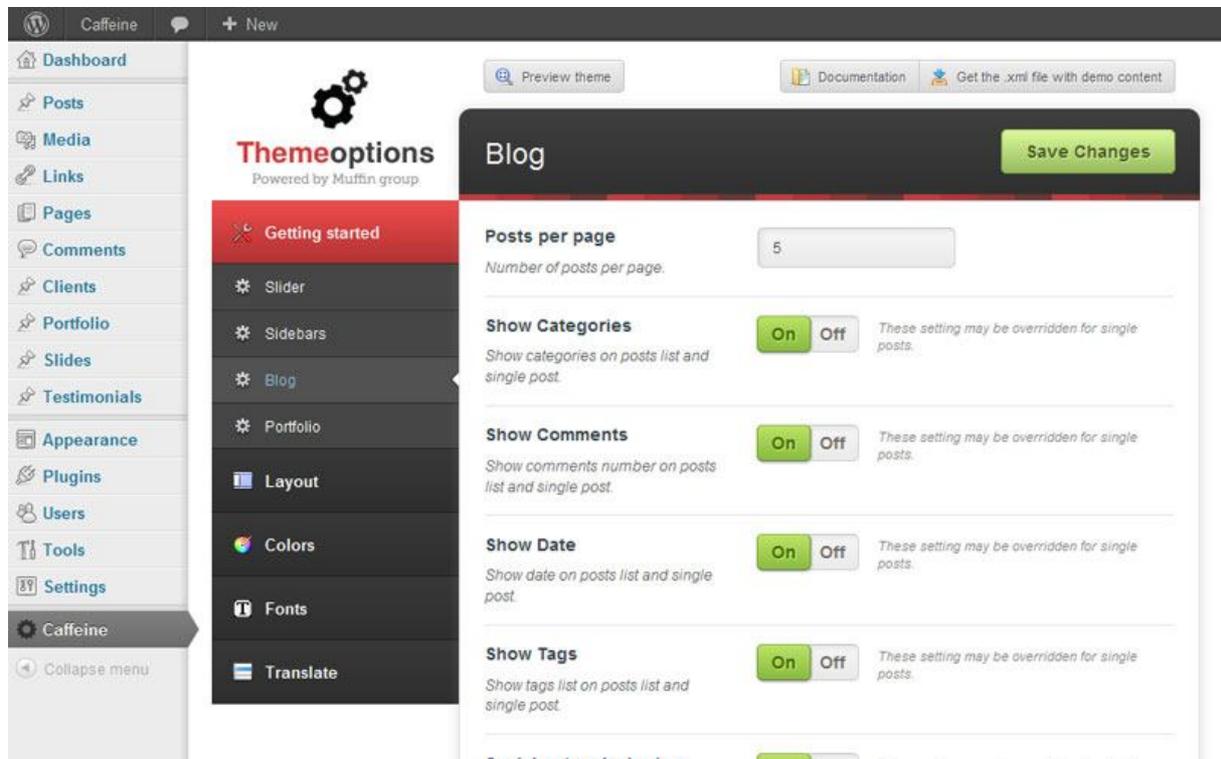

This is default option for pages and posts. Here you can set whether your post or page should have full width or maybe include a sidebar (left or right). For example when you choose *Left sidebar* each of your pages or post that you will create will have left sidebar. **Of course, this is only default option and while creating page or post you can set up your own layout.**

You can also manage your Sidebars here. You can add new and delete existing one.

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

4.1.4 Blog

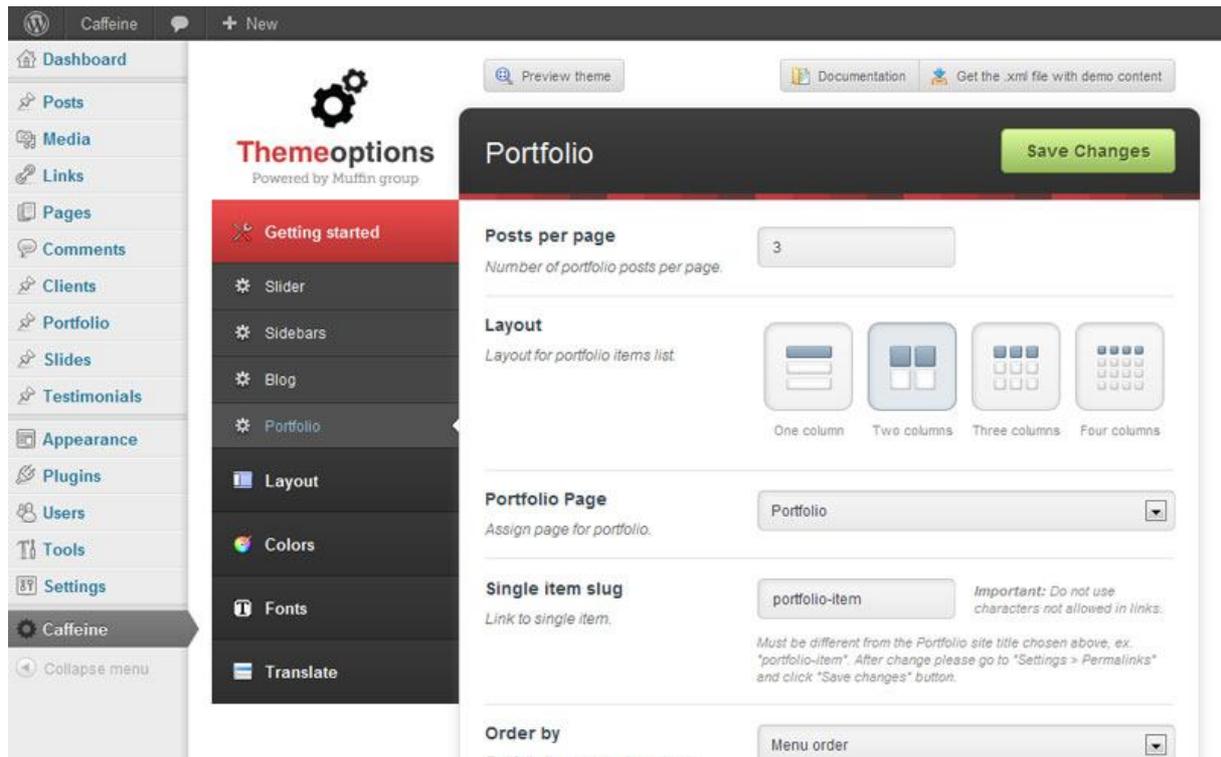

Here you can find some options for blog page. This is of course a default option for new pages. You have got the following options for blog:

- **Posts per page** - you can select how many posts should be on page.
- **Show categories** - this option will show categories on posts list and single post when it is on.
- **Show comments** - this option will show comments number on posts list and single post when it is on.
- **Show date** - this option will show date on posts list and single post when it is on.
- **Show tags** - this option will show tags on posts list and single post when it is on.
- **Social network sharing** - this option will show social network sharing on single post when it is on.
- **Read more** - here you can set up your own text for *read more button*. When input is empty the text will not be show.

All of this options except *Posts per page* and *Read more* can be changed for each post.

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

4.1.5 Portfolio

This option will certainly be very helpful in creating your portfolio page. Here you can set the following options:

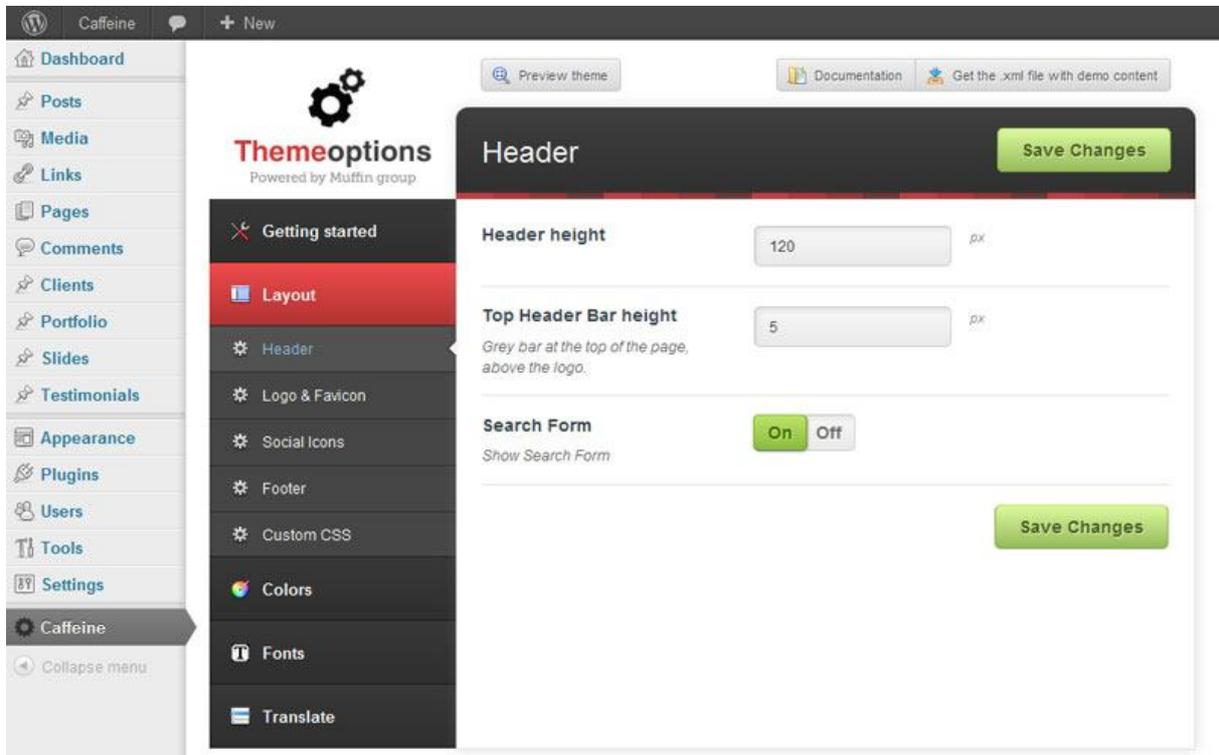

- **Posts per page** - this is the number of portfolio posts per page.
- **Layout** - you can choose what layout will be the best for your portfolio (one, two, three or four columns)
- **Portfolio page** - here you can select the right page for portfolio from list of all created pages. You need to choose a page for that because the theme applies info such a layout, sidebar and link to page in breadcrumbs.
- **Single item slug** - this is a link to single item. After changing that option please go to "Settings > Permalinks" and click "Save changes" button.
- **Order by** - you can select what should be used to sort your portfolio.
- **Order** - you can choose how your portfolio should be ordered (ascending or descending).

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

4.2 Layout

In this section you can set up some layout options such as social icons or logo.

4.2.1. Header

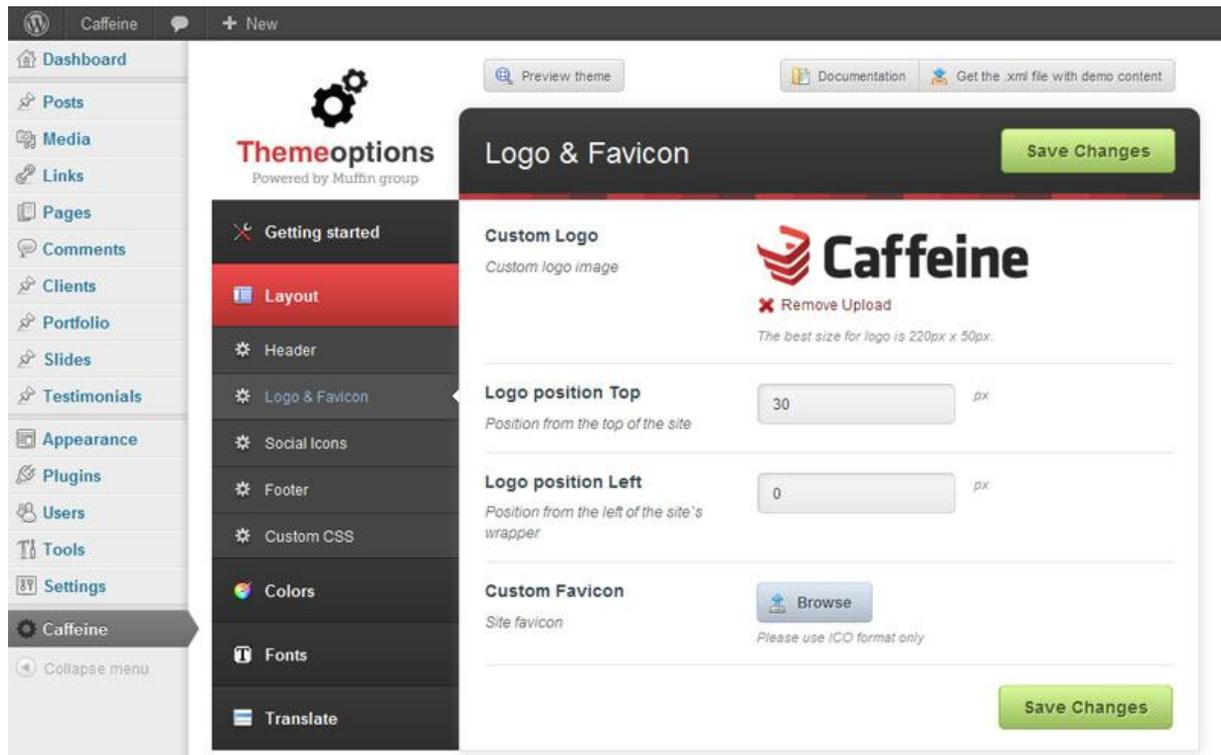

This section is created for header. Here you can set up some options like:

- **Header hight** - you can set up here hight for your header bar (header is white section where you have things like logo, social icons, top menu and search form).
- **Top Header Bar height** - this is height for grey bar above the logo.
- **Search form** - you can turn on/off search form in header.

Please always remember to click *"Save Changes"* button. Without that you will lose all your changes.

4.2.2. Logo & favicon

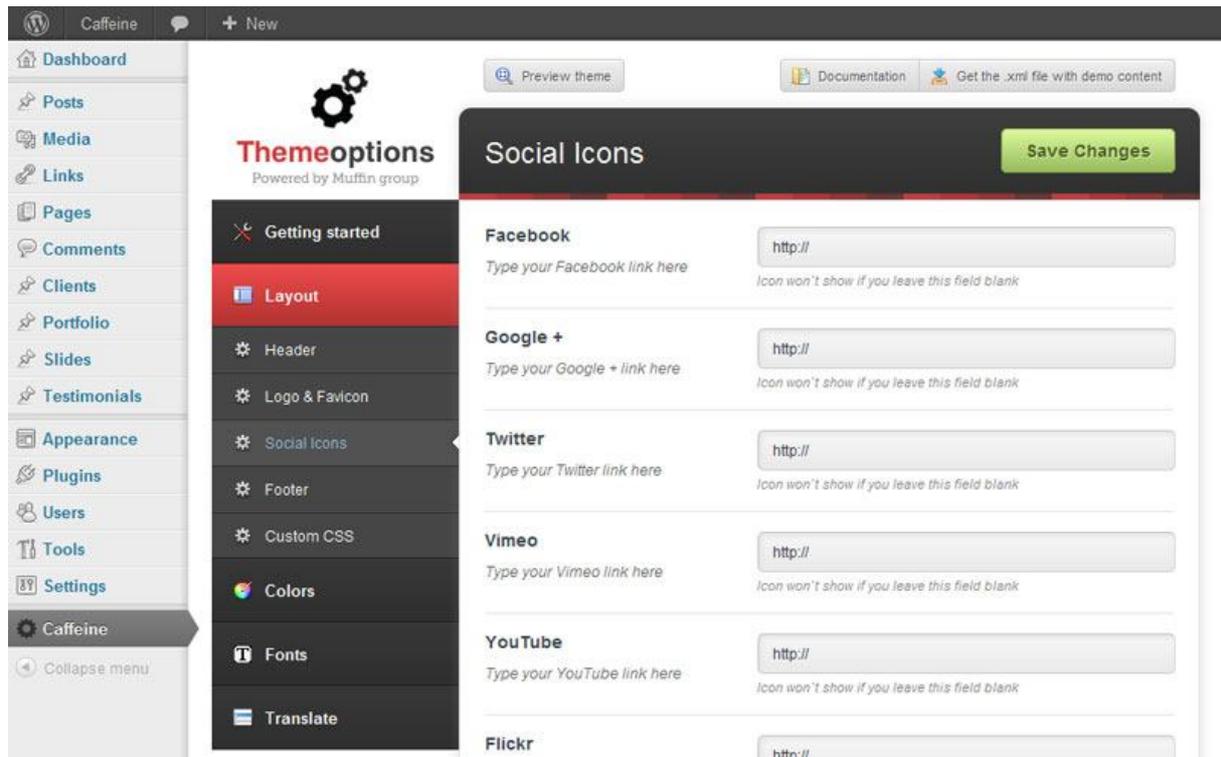

With the help of these options you can easily set up your logo and favicon.

- **Custom logo** - here all you need to do is just upload the image for your logo
- **Logo position Top** - position for the logo from the top of the site
- **Logo position Left** - position for the logo from the left of the site
- **Custom Favicon** - you can upload here your favicon (only **ICO format** can be used here)

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

4.2.3 Social Icons

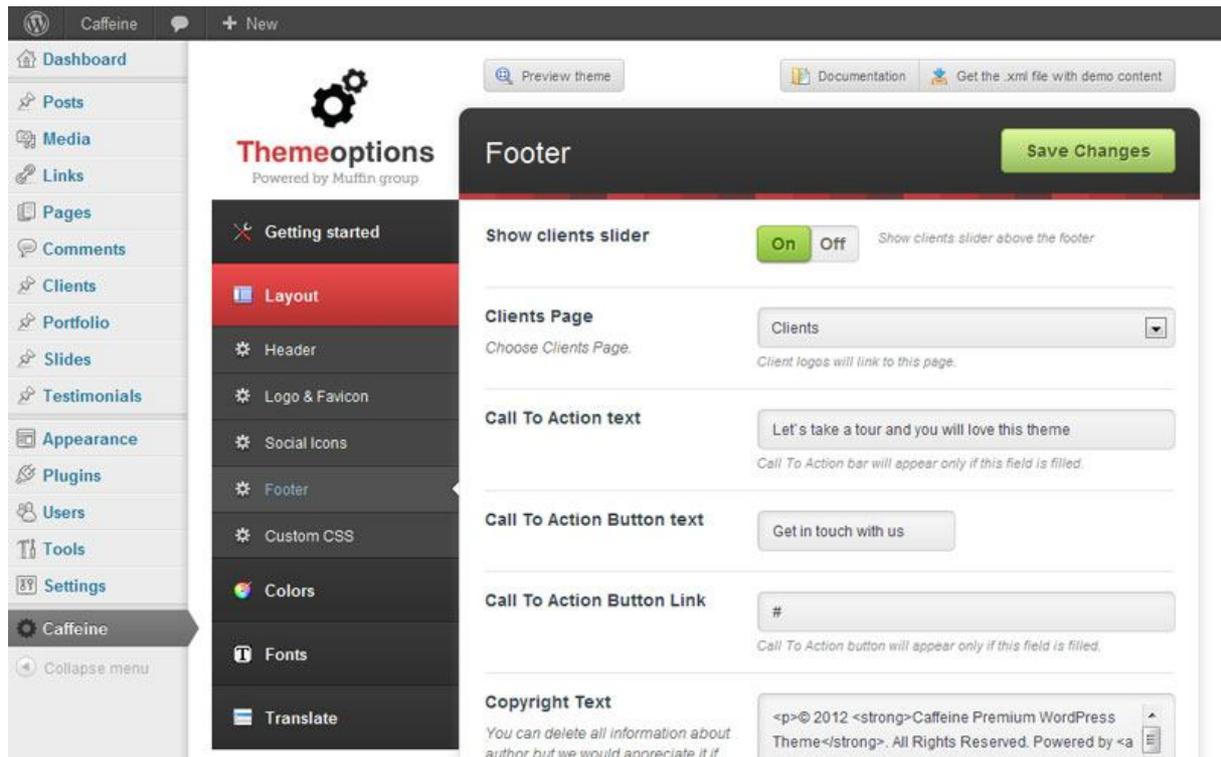

Here you can set up some options for social icons. Below we will describe all of them.

- **Facebook** - link to your facebook profile
- **Twitter** - link to your twitter profile
- **Vimeo** - link to your vimeo profile
- **Google +** - link to your Google + profile
- **YouTube** - link to your youtube profile
- **Flickr** - link to your flickr profile
- **LinkedIn** - link to your LinkedIn profile
- **Dribbble** - link to your Dribbble profile
- **Pinterest** - link to your Pinterest profile
- **RSS** - you can turn on/off your rss icon

If you leave empty field for social icons like facebook, twitter etc. **the icons will be not shown on the page.**

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

4.2.4. Footer

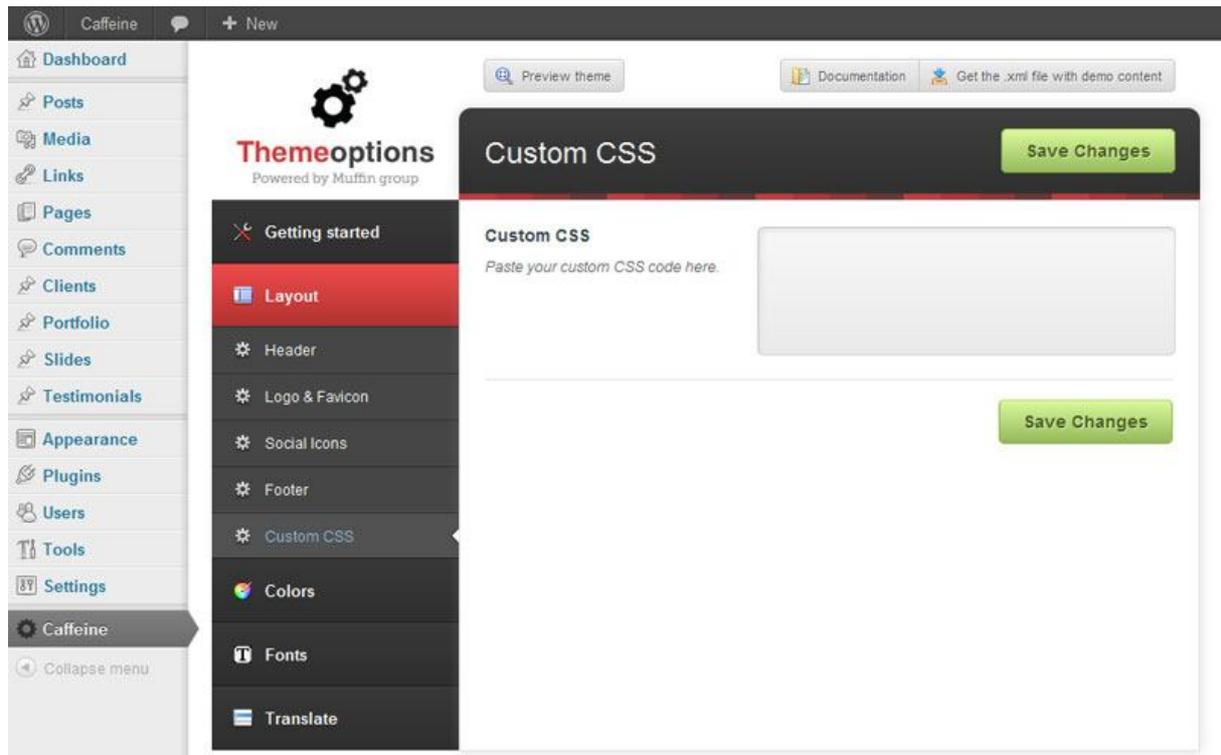

Whatever you want change in footer section, you can do it here.

- **Show clients slider** - you can easily turn on/off clients slider just above the footer.
- **Clients Page** - choose the right page for clients page.
- **Call To Action text** - write kindly text for Call To Action area. Call To Action bar will appear only if this field is filled.
- **Call To Action Button text** - text for Call To Action button.
- **Call To Action Button Link** - link for Call To Action button. This button will appear only if this field is filled.
- **Copyright Text** - copyright text in the footer area. You can delete all informations about author but we would appreciate it if you decide to leave them.

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

4.2.5. Custom CSS

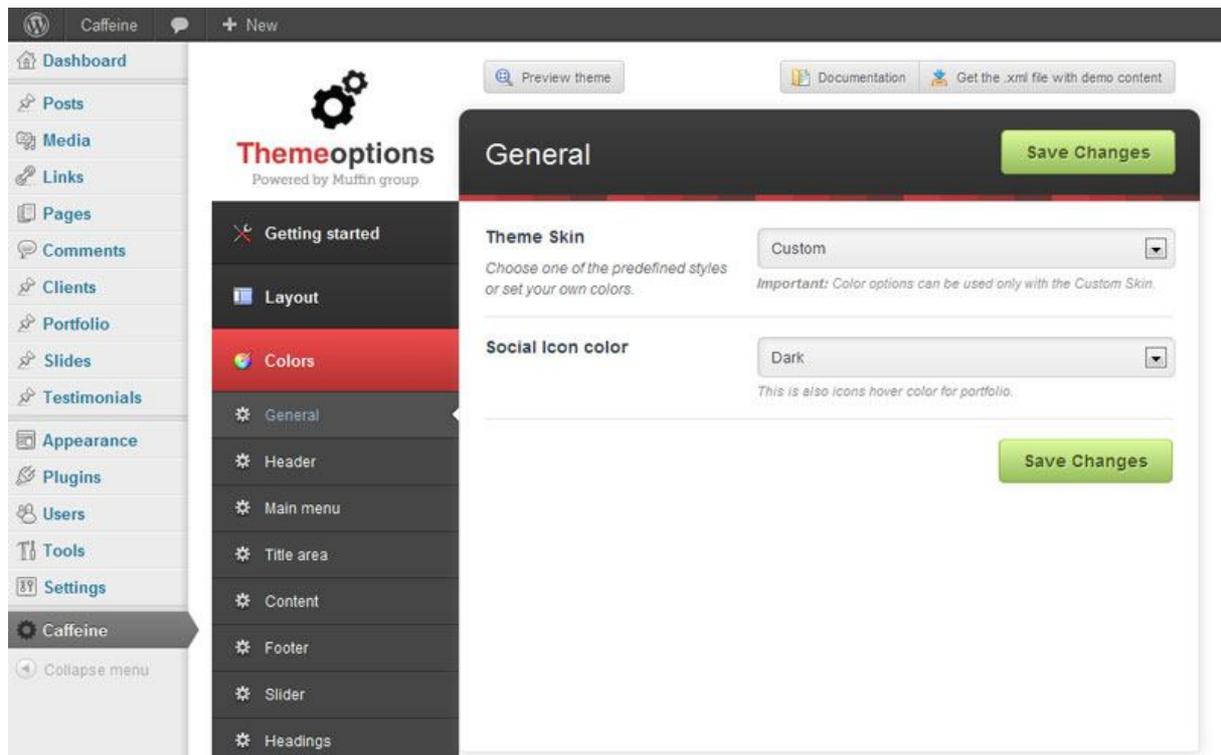

Here you can find only one field called "**Custom CSS**". You can paste here your own css code for your page. Of this field you don't need to make any changes in css files.

Please always remember to click "*Save Changes*" button. Without that you will lose all your changes.

4.3 Colors

This is probably the most powerful options section in theme options panel. Here you can set up any color for each part of your page. Just check how many options you can set up in our color section.

4.3.1. General

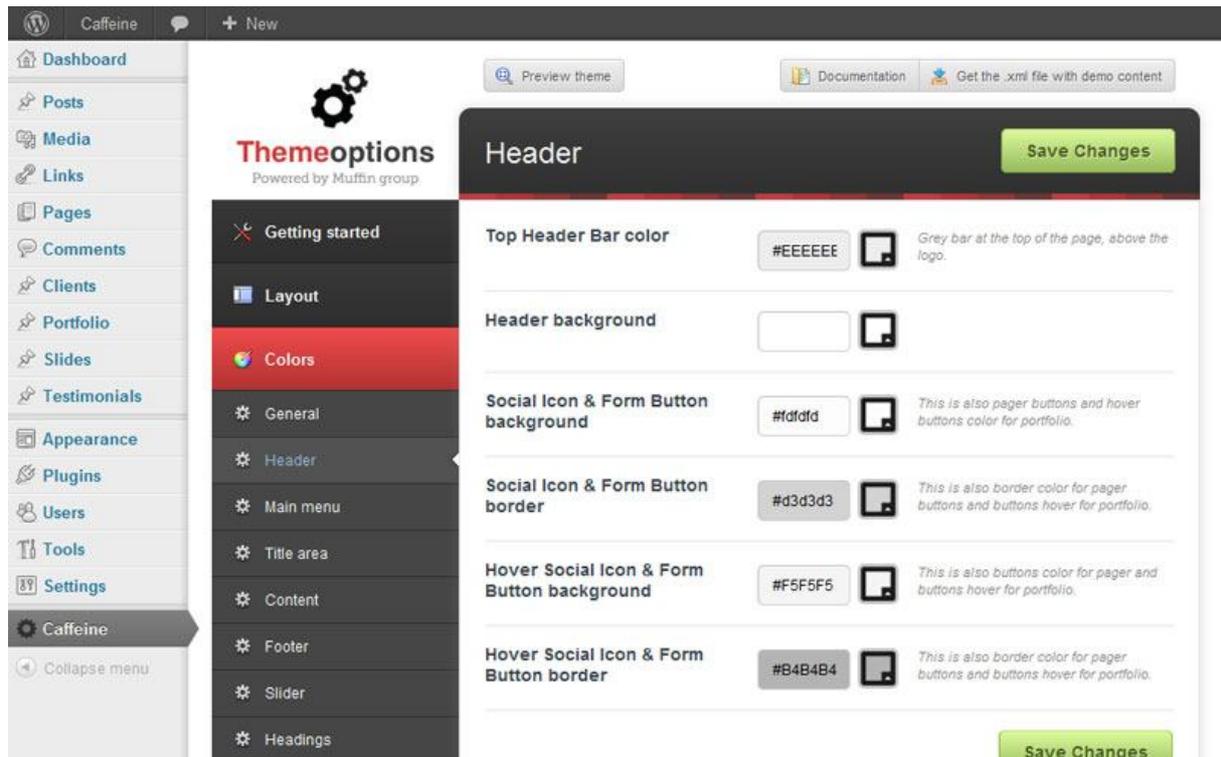

Only two options available in this section.

- **Theme skin** - here you can choose one of the predefined styles or you can set your own colors. Please remember that color options can be used only with the Custom Skin.
- **Social Icon color** - here you can choose one of two available options (dark or light type for your social icons). Remember that this is also icons hover color for portfolio.

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

4.3.2 Header

The screenshot shows the WordPress dashboard with the Themeoptions plugin interface. The left sidebar contains navigation menus for Dashboard, Posts, Media, Links, Pages, Comments, Clients, Portfolio, Slides, Testimonials, Appearance, Plugins, Users, Tools, Settings, and Caffeine. The main content area is titled 'Header' and features a 'Save Changes' button in the top right corner. Below the title, there are six color selection options, each with a color picker, a hex code, and a preview icon:

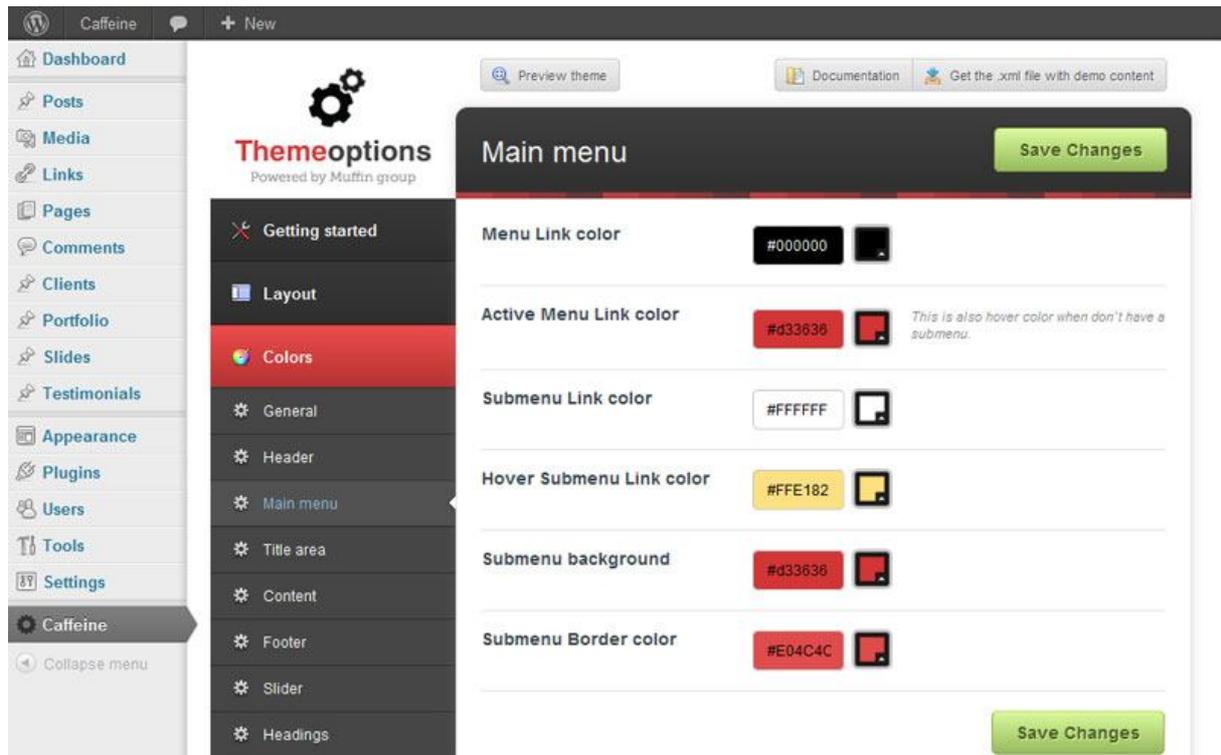

- Top Header Bar color**: #EEEEEE. Grey bar at the top of the page, above the logo.
- Header background**: (empty field).
- Social Icon & Form Button background**: #dfdfd. This is also pager buttons and hover buttons color for portfolio.
- Social Icon & Form Button border**: #d3d3d3. This is also border color for pager buttons and buttons hover for portfolio.
- Hover Social Icon & Form Button background**: #F5F5F5. This is also buttons color for pager and buttons hover for portfolio.
- Hover Social Icon & Form Button border**: #B4B4B4. This is also border color for pager buttons and buttons hover for portfolio.

A second 'Save Changes' button is located at the bottom right of the settings panel.

- **Top Header Bar color** - this is color for grey bar at the top of the page, above the logo.
- **Header background** - color for the header background
- **Social Icon & Form Button background** - this is color for the social icon and form button background, but also this is pager buttons and hover buttons color for portfolio.
- **Social Icon & Form Button border** - this is border color for the social icons and form buttons, but also this is border color for pager buttons and hover buttons in portfolio.
- **Hover Social Icon & Form Button background** - this is hover color for the social icons and form buttons background, but also this is hover color for pager buttons and hover buttons in portfolio.
- **Hover Social Icon & Form Button border** - this is border color for the social icons and form buttons background, but also this is border color for pager buttons and hover buttons in portfolio.

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

4.3.3 Main menu

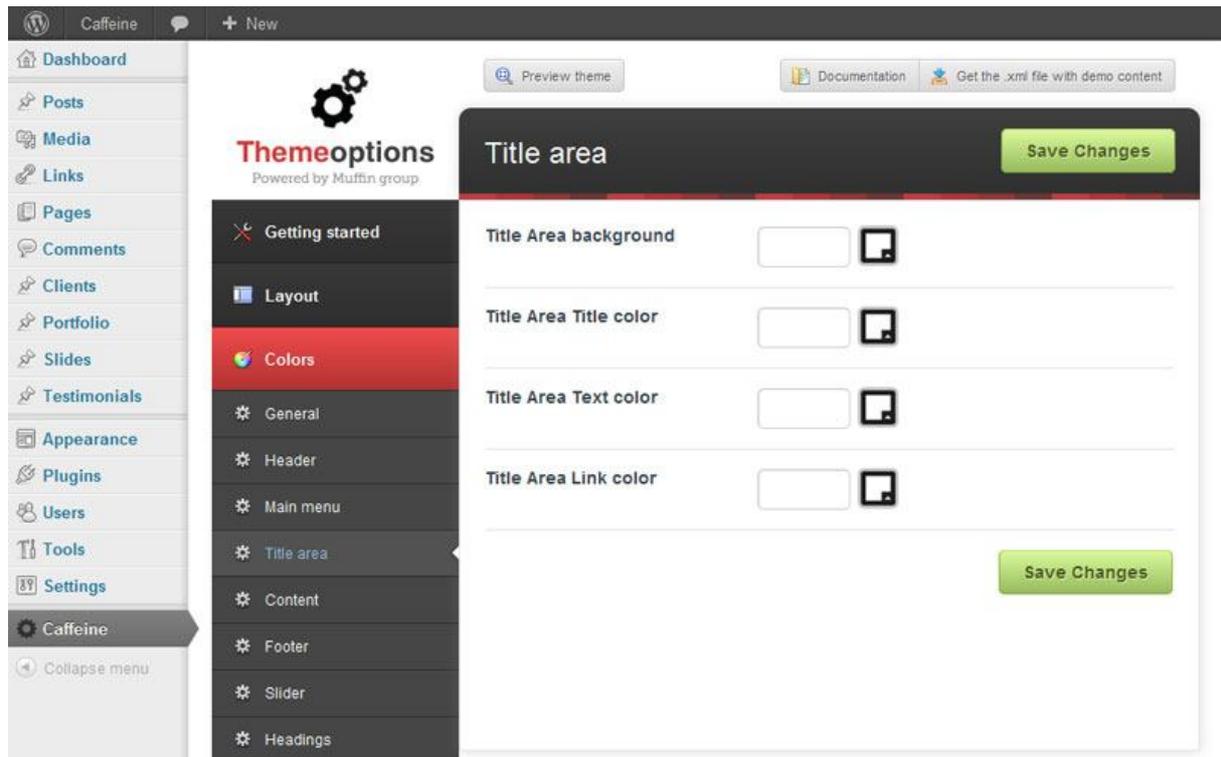

The screenshot shows the Themeoptions dashboard for the Caffeine theme. The left sidebar contains navigation options: Dashboard, Posts, Media, Links, Pages, Comments, Clients, Portfolio, Slides, Testimonials, Appearance, Plugins, Users, Tools, Settings, and Caffeine. The main content area is titled 'Main menu' and features a 'Save Changes' button. The settings are as follows:

Setting	Value	Preview	Notes
Menu Link color	#000000	Black square	
Active Menu Link color	#d33636	Red square	This is also hover color when don't have a submenu.
Submenu Link color	#FFFFFF	White square	
Hover Submenu Link color	#FFE182	Yellow square	
Submenu background	#d33636	Red square	
Submenu Border color	#E04C4C	Red square	

- **Menu Link color** - color for links in menu
- **Active Menu Link color** - active color for links in menu (this is also color for hover when there is no submenu)
- **Submenu Link color** - color for submenu links
- **Hover Submenu Link color** - hover color for submenu links
- **Submenu background** - color for submenu background
- **Submenu border color** - border color for submenu

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

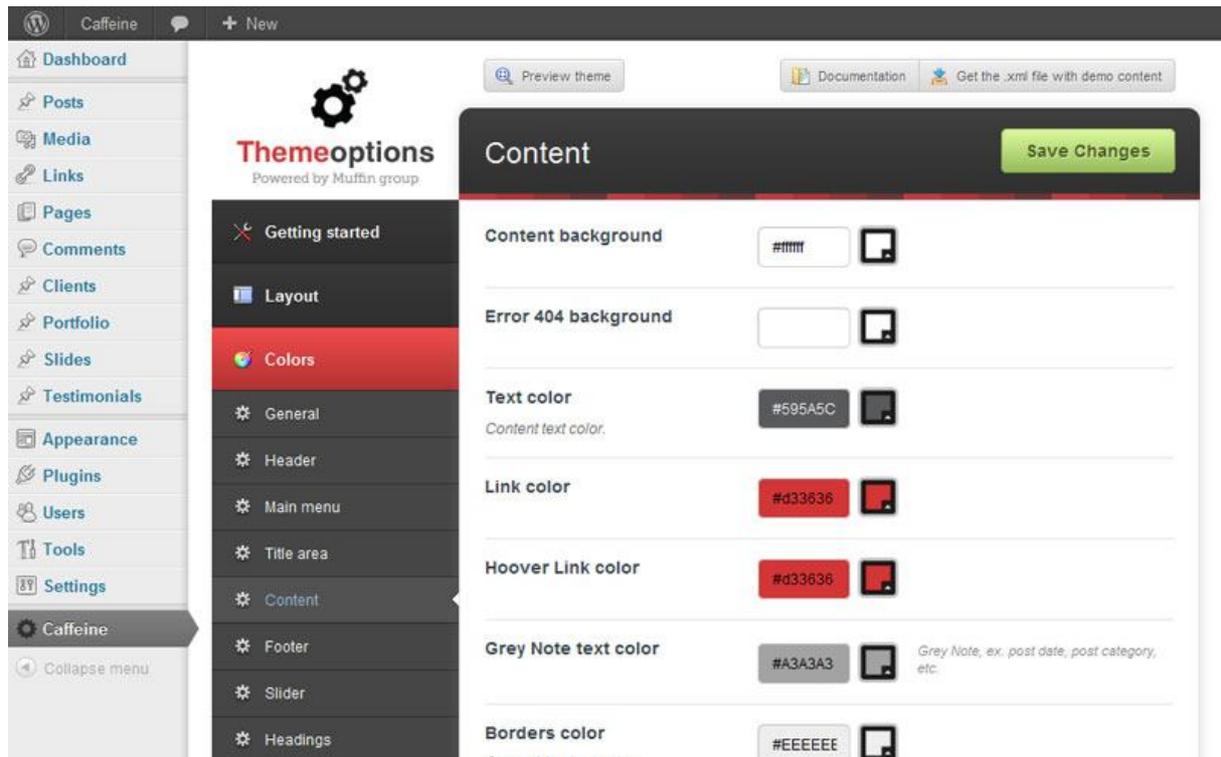

4.3.4 Title area

- **Title Area background** - background color for title area

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

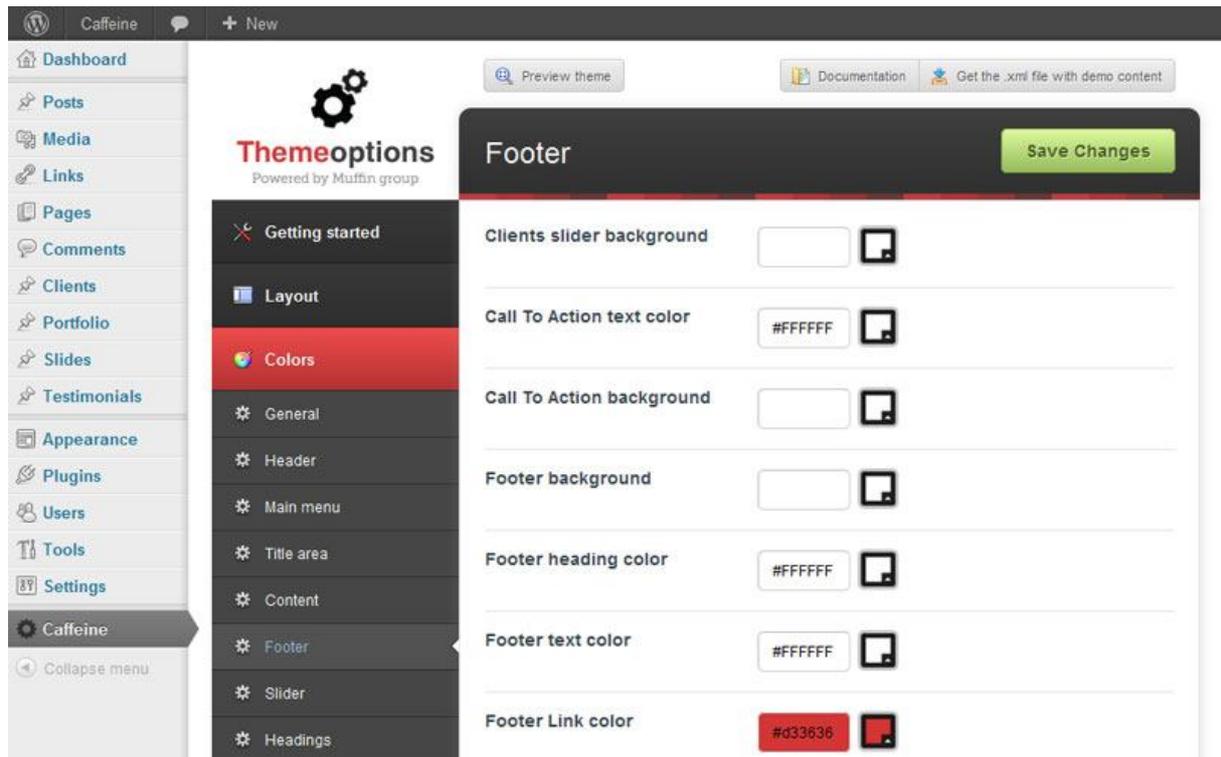

4.3.5 Content

- **Content background** - background color for content page
- **Error 404 background** - background color for Error 404 page
- **Text color** - text color for content
- **Link color** - text color for links
- **Hover Link color** - hover color for links
- **Grey Note text color** - text color for grey note, ex. post date, post category, etc.
- **Borders color** - general borders color
- **Dark Circle background** - background color for dark gray circles like slider controls, number of comments, etc.
- **Dark Circle text color** - text color for dark gray circles like slider controls, number of comments, etc.
- **Dark Circle border** - border color for dark gray circles like slider controls, number of comments, etc.
- **Button background** - background color for buttons
- **Button text color** - text color for buttons

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

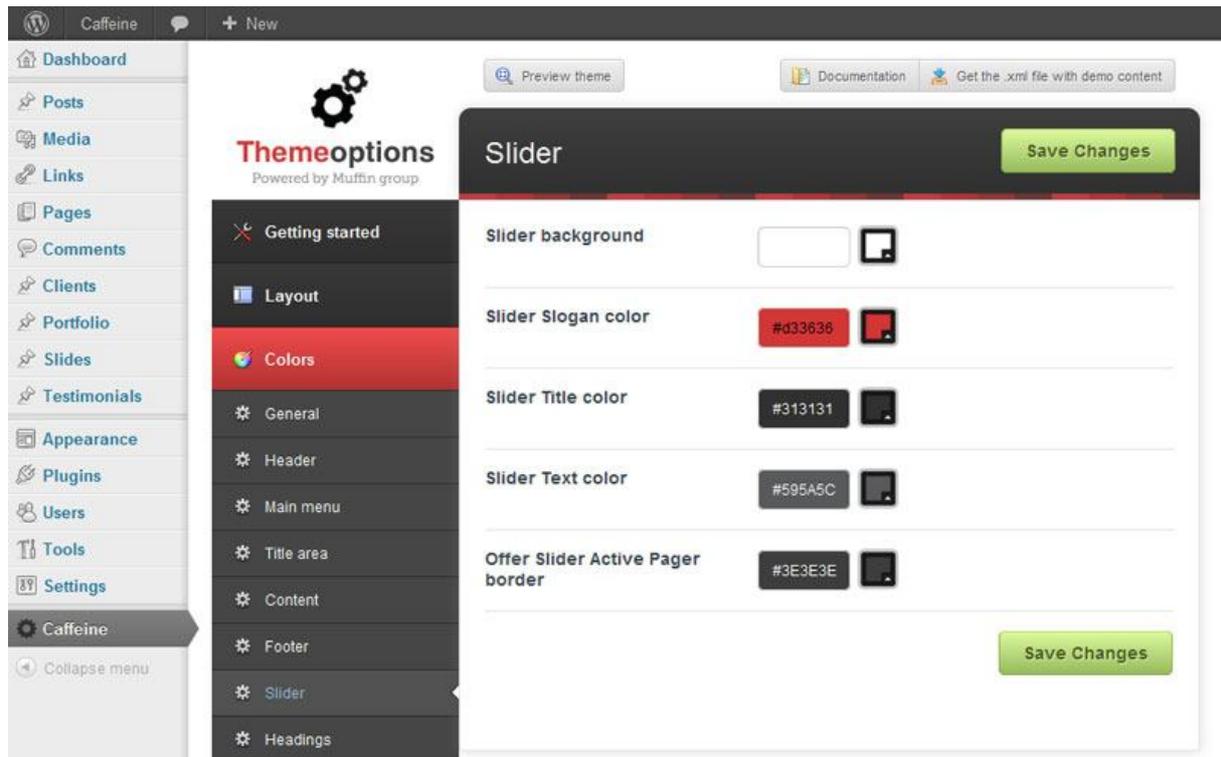

4.3.6 Footer

- **Footer background** - background color for footer
- **Footer heading color** - heading color for footer
- **Footer text color** - text color for footer
- **Footer Link color** - links color for footer
- **Hover Footer Link color** - hover links color for footer
- **Footer border color** - border color for footer
- **Copyrights Area background** - background color for copyright area
- **Copyrights Area text color** - text color for copyright area

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

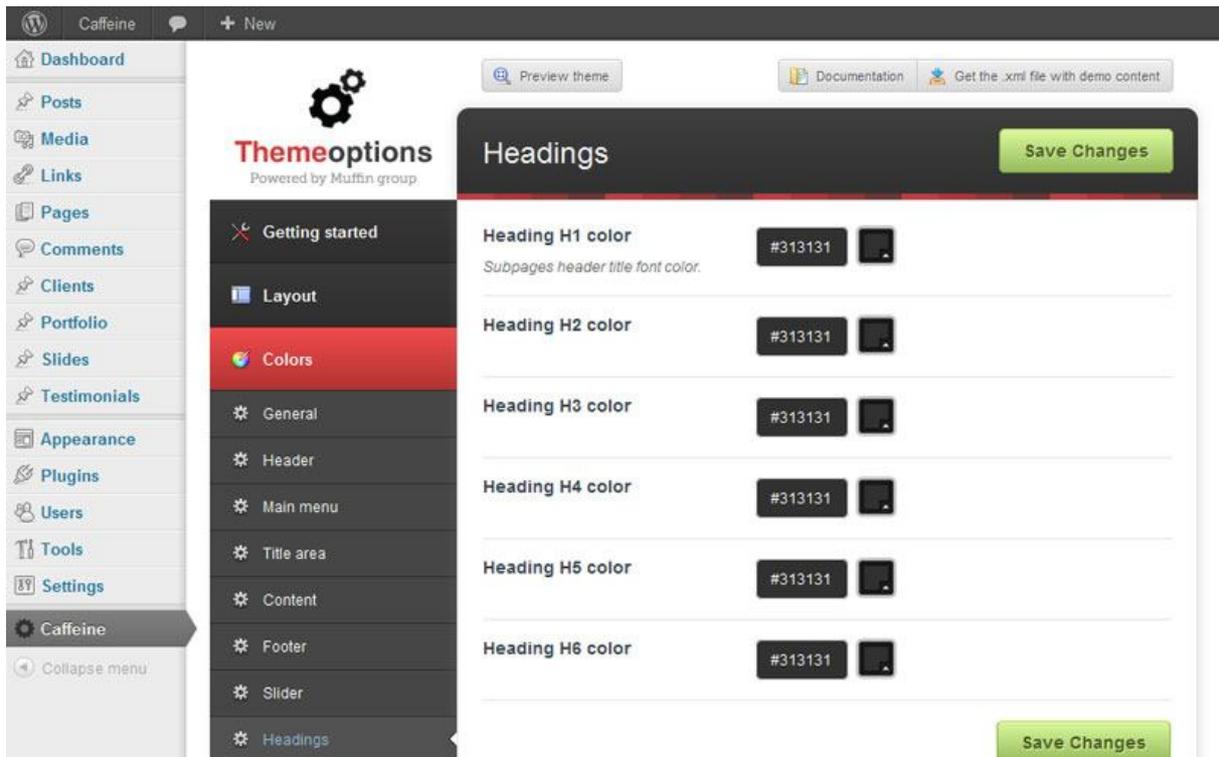

4.3.7 Slider

- **Slider background** - background color for slider area
- **Slider Slogan color** - slogan color in slider (first few words in default red color)
- **Slider Title color** - title color in slider (the largest words)
- **Slider Text color** - text color in slider (few words under the title in default light grey color)
- **Offer Slider Active Pager border** - border color for active pager in offer slider

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

4.3.8 Headings

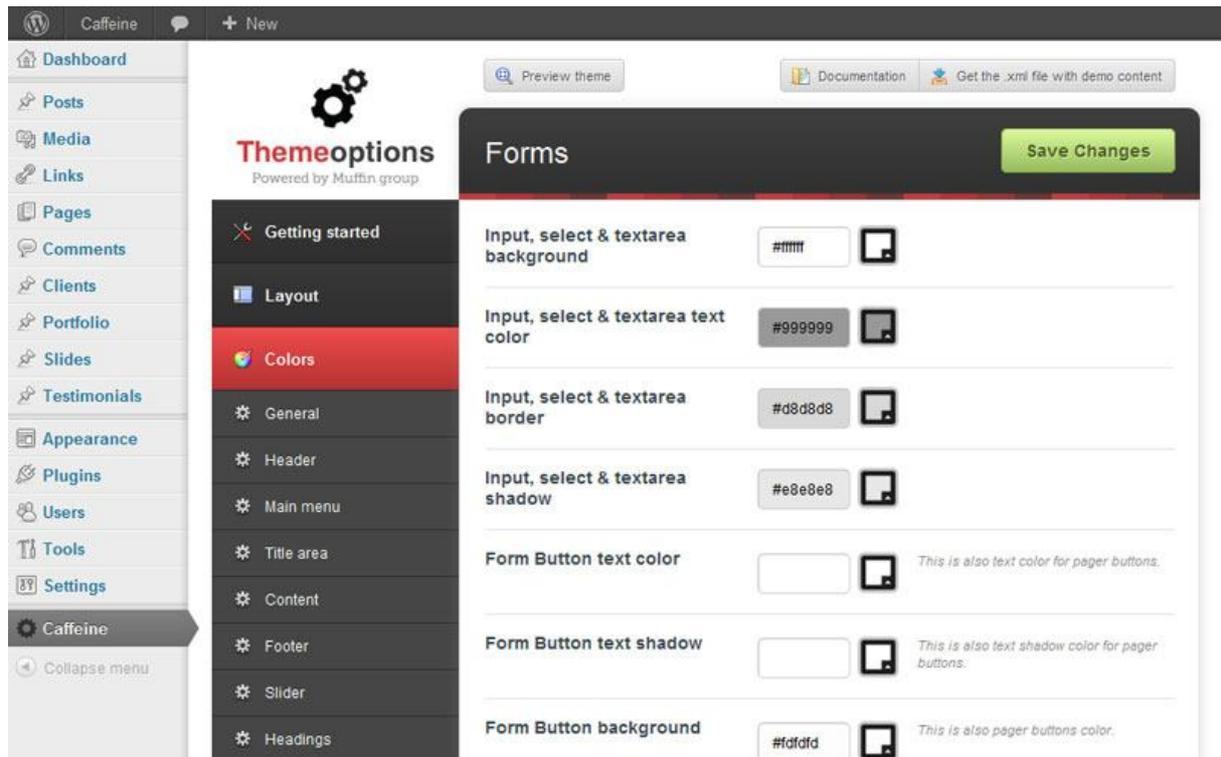

The screenshot shows the Themeoptions dashboard for the Caffeine theme. The left sidebar contains navigation links for Dashboard, Posts, Media, Links, Pages, Comments, Clients, Portfolio, Slides, Testimonials, Appearance, Plugins, Users, Tools, Settings, and Caffeine. The main content area is titled 'Headings' and features a 'Save Changes' button at the top right. Below the title, there are six rows, each representing a heading level (H1 to H6). Each row has a label, a description, and a color picker set to #313131. The descriptions are: 'Subpages header title font color.' for H1, and blank for H2 through H6. A second 'Save Changes' button is located at the bottom right of the settings area.

- **Heading H1 color** - text color for h1 (Subpages header title font color)
- **Heading H2 color** - text color for h2
- **Heading H3 color** - text color for h3
- **Heading H4 color** - text color for h4
- **Heading H5 color** - text color for h5
- **Heading H6 color** - text color for h6

Please always remember to click *"Save Changes"* button. Without that you will lose all your changes.

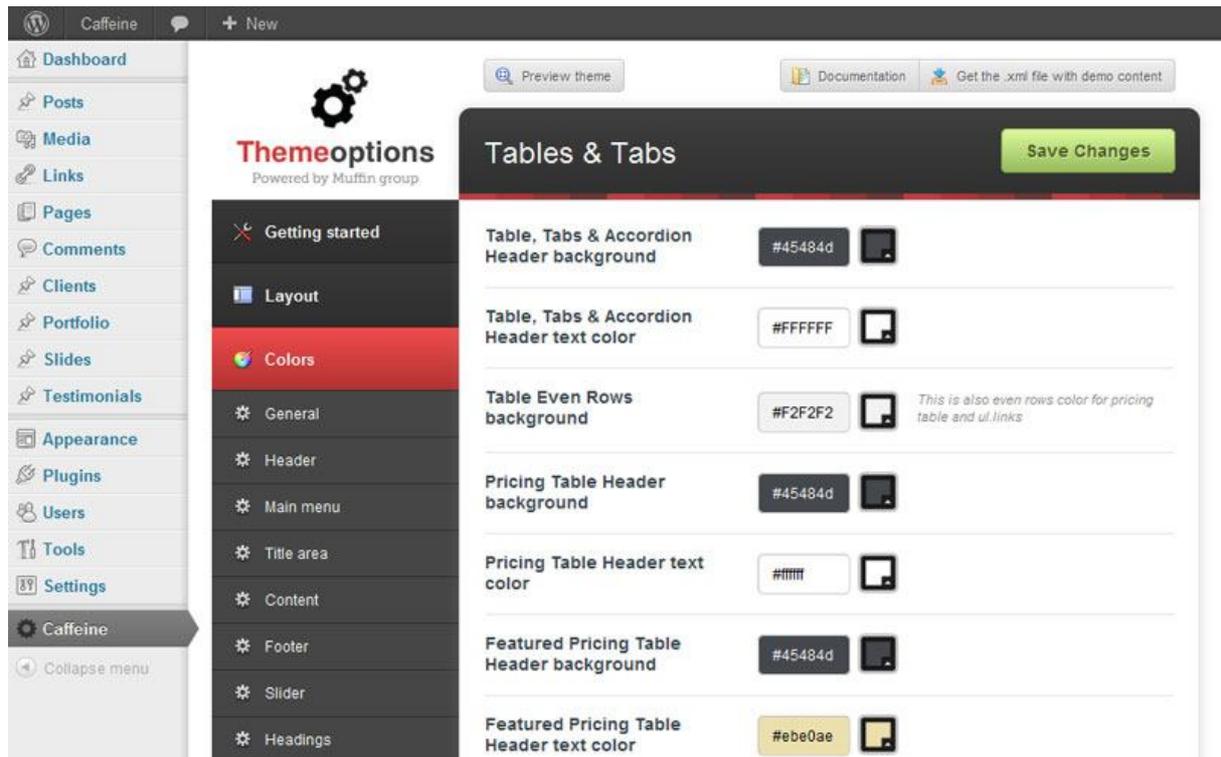

4.3.9 Forms

- **Input, select & textarea background** - background color for inputs, selects and textareas
- **Input, select & textarea text color** - text color for inputs, selects and textareas
- **Input, select & textarea border** - border color for inputs, selects and textareas
- **Input, select & textarea shadow** - shadow color for inputs, selects and textareas
- **Form Button text color** - text color for form buttons
- **Form Button text shadow** - shadow color for form buttons
- **Form Button background** - background color for form buttons
- **Form Button border** - border color for form buttons
- **Hover Form Button background** - background color for hover form buttons
- **Hover Form Button border** - border color for hover form buttons

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

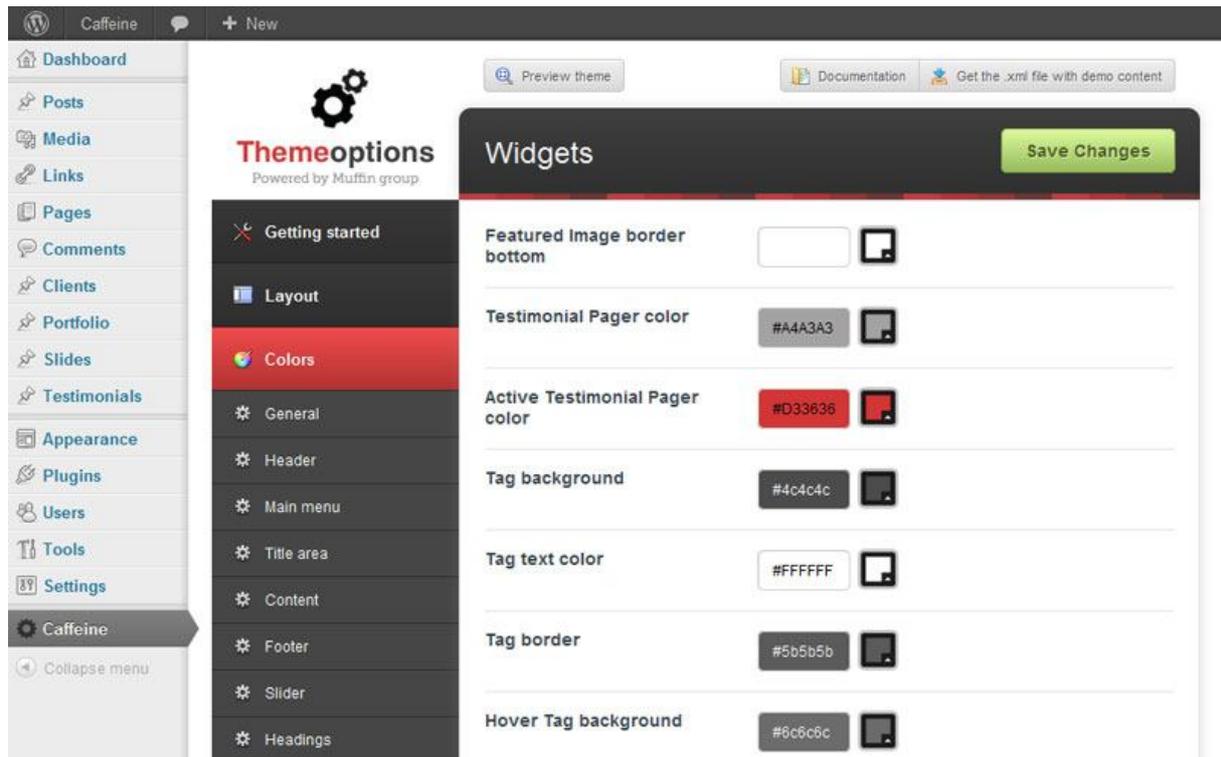

4.3.10 Tables & Tabs

- **Table, Tabs & Accordion Header background** - background color for tables, tabs and accordions header
- **Table, Tabs & Accordion Header text color** - text color for tables, tabs and accordions header
- **Table Even Rows background** - background color for even rows in tables
- **Pricing Table Header background** - background color for header in pricing tables
- **Pricing Table Header text color** - text color for header in pricing tables
- **Featured Pricing Table Header background** - background color for header in featured pricing table
- **Featured Pricing Table Header text color** - text color for header in featured pricing table

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

4.3.11 Widgets

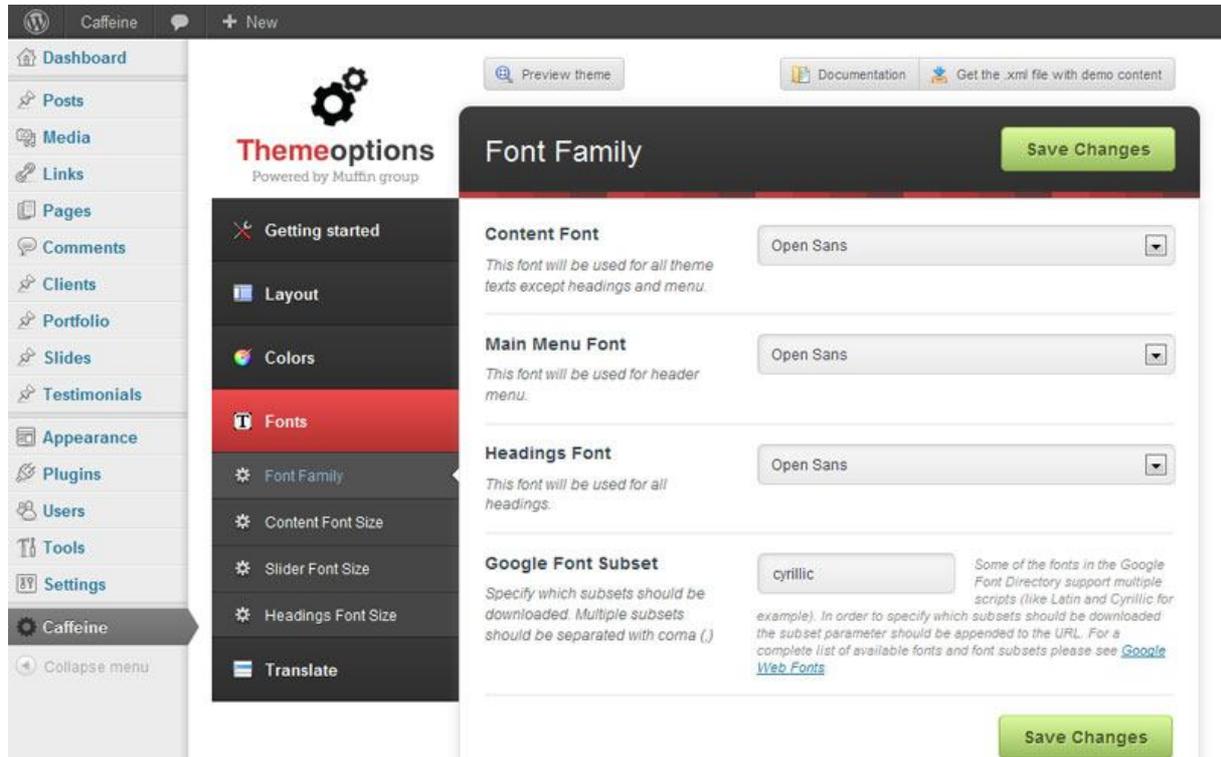

- **Featured Image border bottom** - bottom border color for featured image
- **Testimonial Pager color** - color for testimonial pager
- **Active Testimonial Pager color** - color for active testimonial pager
- **Clients background** - background color for clients area
- **Call to action text color** - text color for call to action area
- **Call To Action background** - background color for call to action area
- **Tag background** - background color for tag area
- **Tag text color** - text color for tag area
- **Tag border** - border color for tag area
- **Hover Tag background** - background color for hover tag area
- **Hover Tag border** - border color for hover tag area

Please always remember to click "Save Changes" button. Without that you will lose all your changes.

4.4 Fonts

In this section you can set up fonts for your website. We divided this section on four blocks what you can see below.

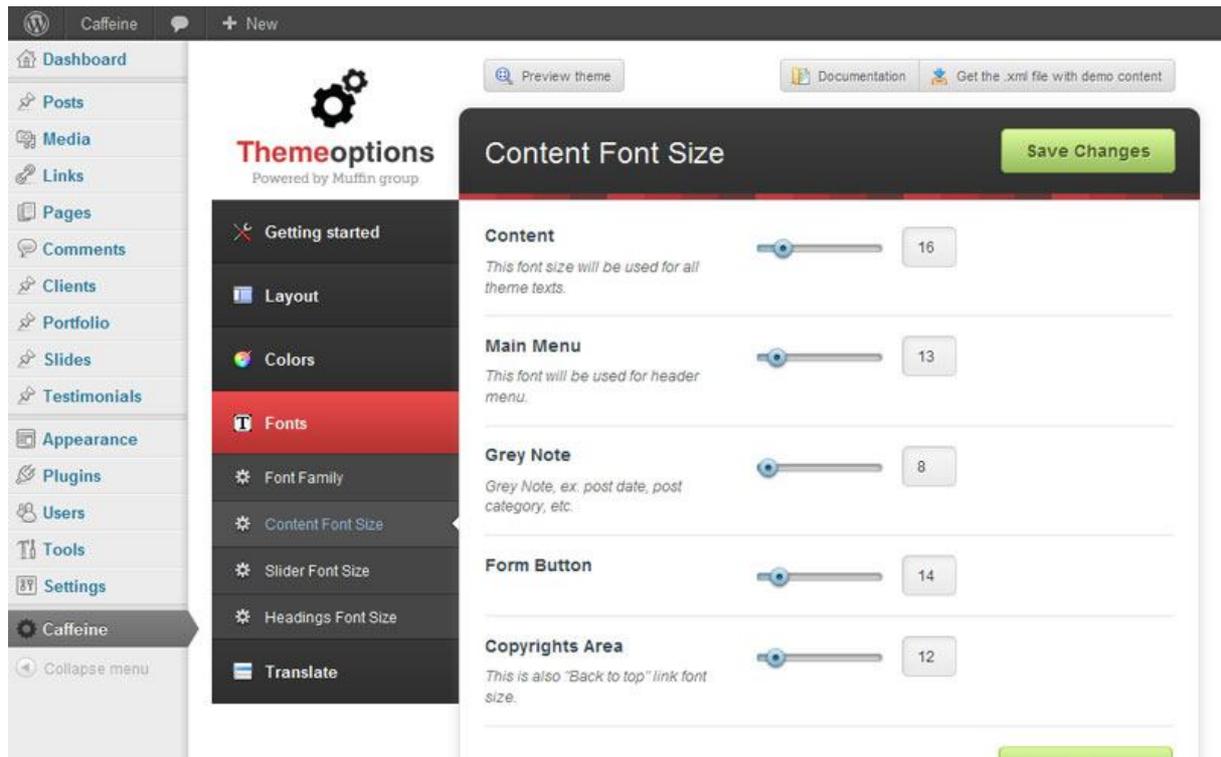

4.4.1 Font Family

- **Content Font** - this font will be used for all theme texts except *headings* and *menu*
- **Main Menu Font** - this font will be used for header menu
- **Headings Font** - this font will be used for all headings
- **Google Font Subset** - you can specify which subsets should be downloaded. Multiple subsets should be separated with coma (,)

You can choose your own font from a palette of **over 500 fonts**.

4.4.2 Content Font Size

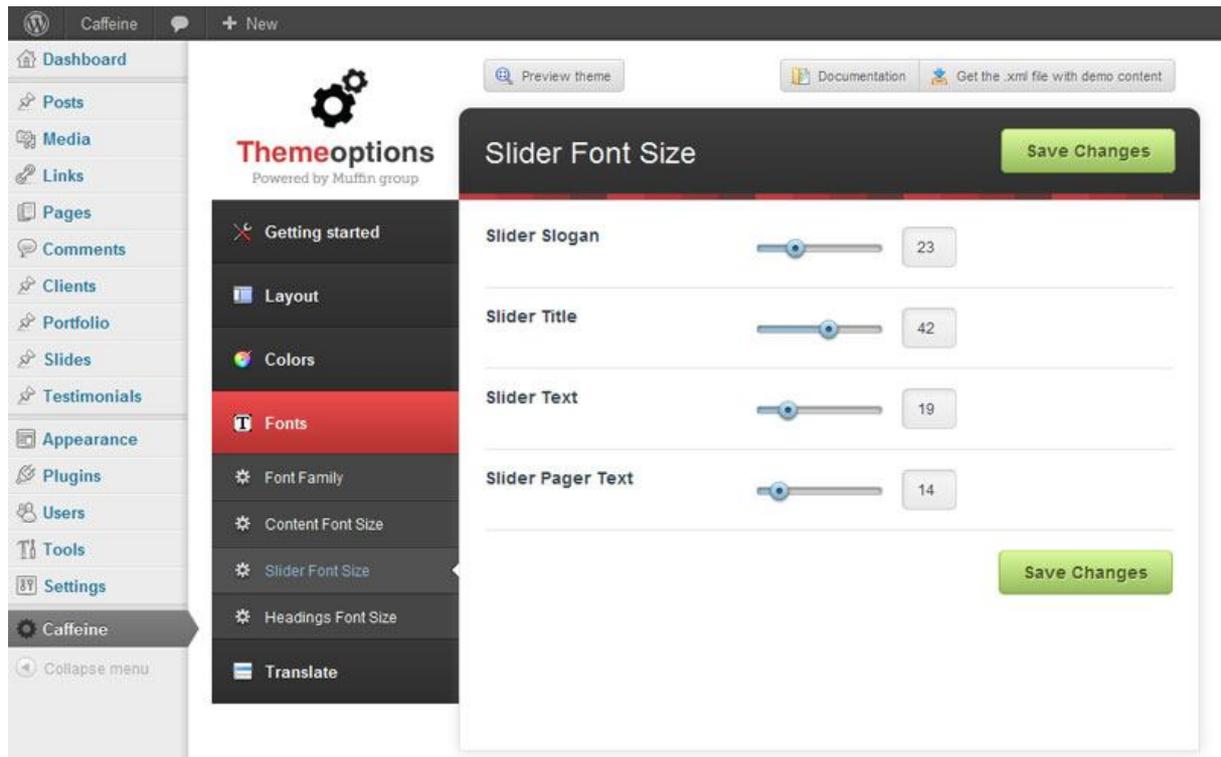

The screenshot shows the 'Themeoptions' interface for the 'Caffeine' theme. The left sidebar contains a navigation menu with categories like 'Getting started', 'Layout', 'Colors', 'Fonts', and 'Translate'. The 'Fonts' category is expanded, showing sub-options: 'Font Family', 'Content Font Size', 'Slider Font Size', and 'Headings Font Size'. The main content area is titled 'Content Font Size' and features a 'Save Changes' button. It contains five settings, each with a slider and a numerical input field:

Setting	Description	Current Value
Content	This font size will be used for all theme texts.	16
Main Menu	This font will be used for header menu.	13
Grey Note	Grey Note, ex. post date, post category, etc.	8
Form Button		14
Copyrights Area	This is also "Back to top" link font size.	12

- **Content** - this font size will be used for all theme texts
- **Main Menu** - this font will be used for header menu
- **Grey Note** - grey note, ex. *post date, post category*, etc
- **Form Button** - this size will be used for form buttons
- **Copyrights Area** - this size will be used for copyright area but also this is "Back to top" link font size

You can select the font size of the range **1-70**.

4.4.3 Slider Font Size

In this section you can select font sizes for each part of slider. You can change the following value:

- **Slider Slogan** - font size for slider slogan
- **Slider Title** - font size for slider title
- **Slider Text** - font size for slider text
- **Slider Pager Text** - font size for slider pager text

You can select the font size of the range **1-70**.

4.4.4 Headings Font Size

The screenshot displays the Themeoptions dashboard for the 'Caffeine' theme. The sidebar menu on the left includes options like Dashboard, Posts, Media, Links, Pages, Comments, Clients, Portfolio, Slides, Testimonials, Appearance, Plugins, Users, Tools, Settings, Caffeine, and Collapse menu. The main content area is titled 'Headings Font Size' and features a 'Save Changes' button in the top right corner. Below the title, there are six rows, each representing a heading level (H1 through H6). Each row contains a slider control and a numerical input field. The current font sizes are: H1 (42), H2 (42), H3 (23), H4 (19), H5 (15), and H6 (13). A second 'Save Changes' button is located at the bottom right of the settings area.

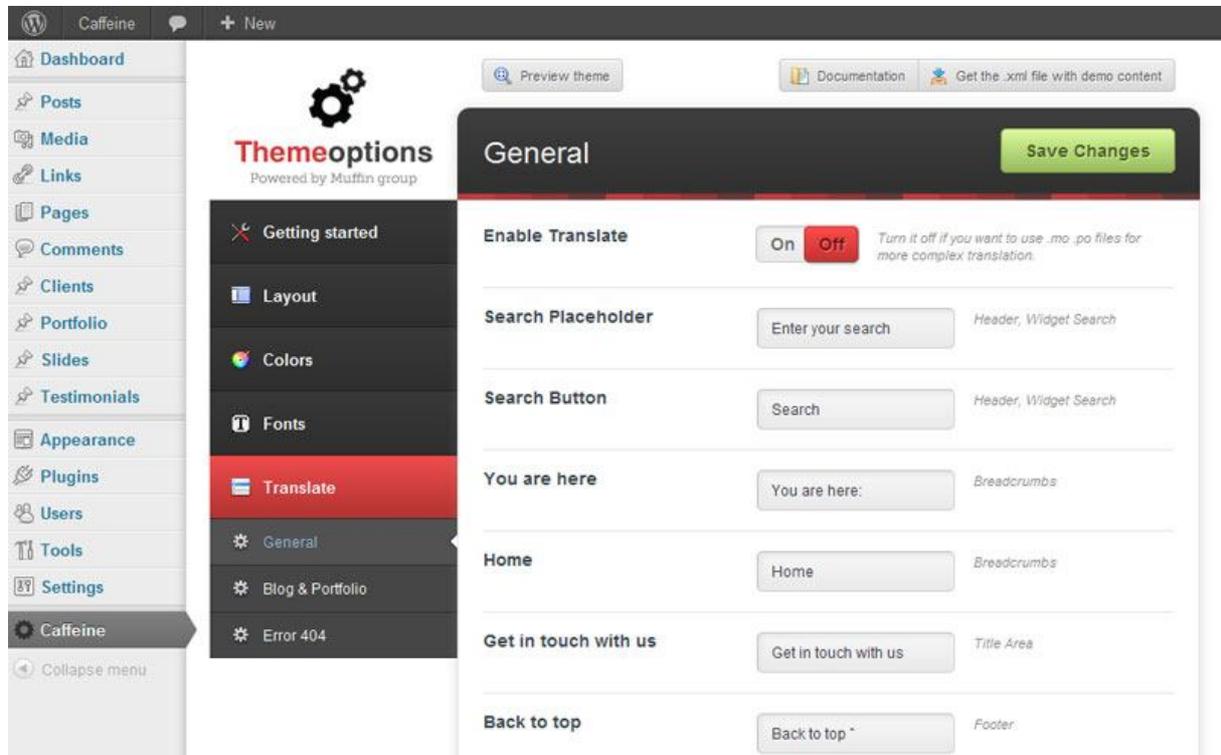

Heading	Font Size
Heading H1	42
Heading H2	42
Heading H3	23
Heading H4	19
Heading H5	15
Heading H6	13

Here you can set up font size for each headings on your page, like: h1, h2, h3, h4, h5, h6.

4.5 Translate

Translating the most important sections on the page has never been so easy.

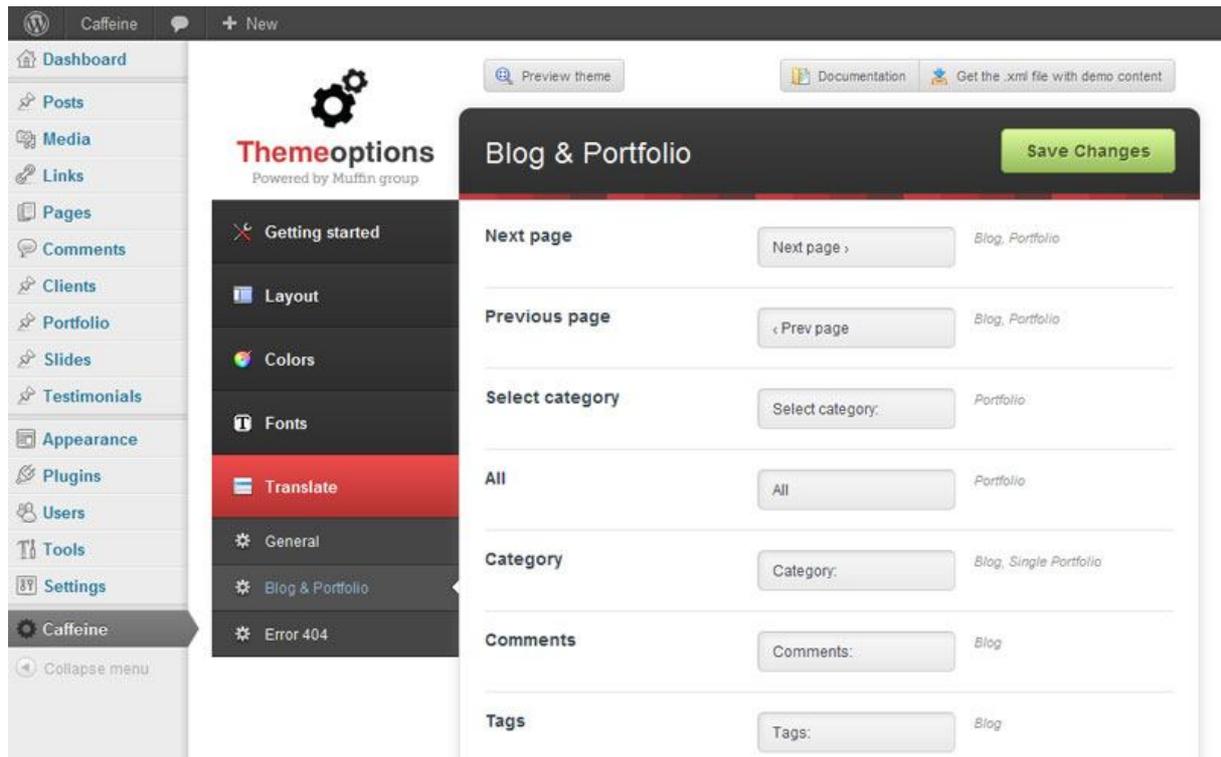

4.5.1 General

It depends how you want translate your theme. If you don't want to translate using .mo and .po files you can do it easily in this section.

- **Enable Translate** - you can turn it off if you want to use .mo/.po files for more complex translation.
- **Search Placeholder** - here you can set up placeholder text for *Header* and *Widget Search*
- **Search Button** - here you can set up button text for *Header* and *Widget Search*
- **You are here** - here you can set up breadcrumbs text
- **Home** - here you can set up breadcrumbs text
- **Get in touch with us** - here you can set up title area
- **Back to top** - here you can set up text for *back to top* action (footer area)

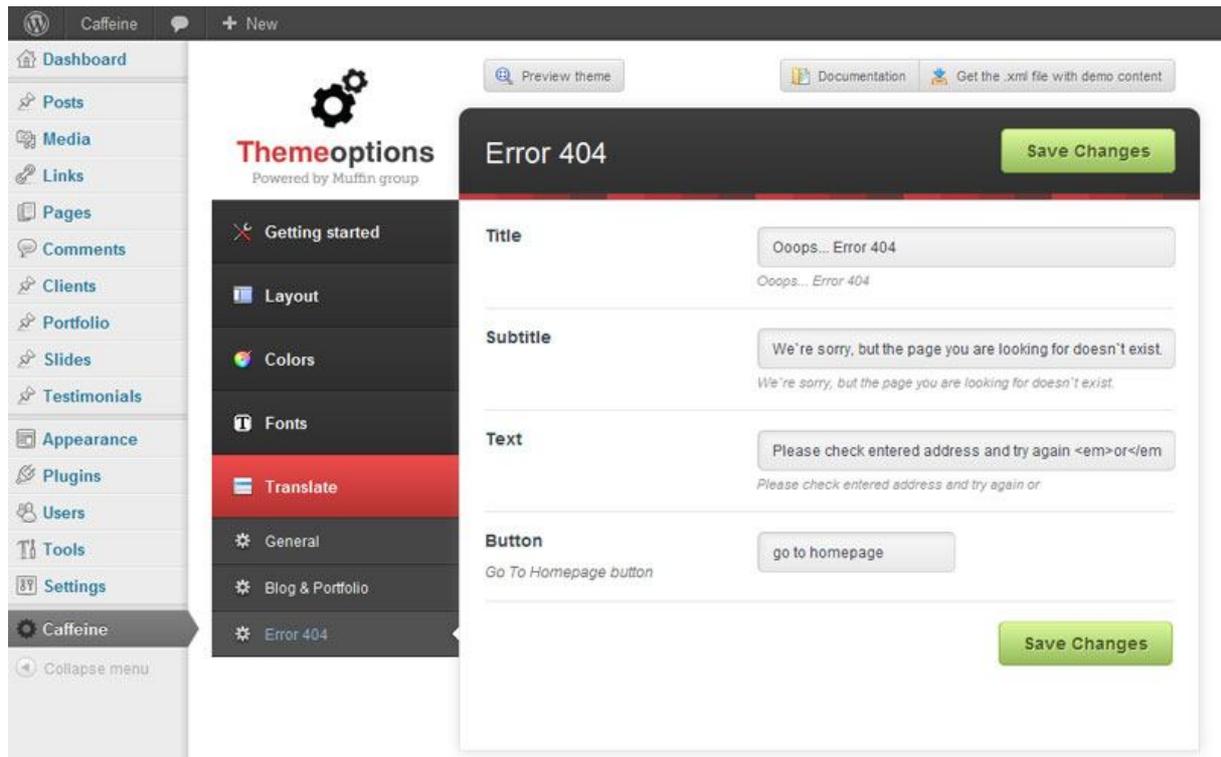

4.5.2 Blog & Portfolio

This is area where you can set up some texts for your portfolio and blog page.

- **Next page** - text available on blog & portfolio page
- **Previous page** - text available on blog & portfolio page
- **Select category** - text available on portfolio page
- **All** - text available on portfolio page
- **Category** - text available on blog & single portfolio page
- **Comments** - text available on blog page
- **Tags** - text available on blog page
- **Project Description** - text available on single portfolio page
- **Client** - text available on single portfolio page
- **Date** - text available on single portfolio page
- **Project URL** - text available on single portfolio page
- **Visit online** - text available on single portfolio page
- **Back to list** - text available on single portfolio page

4.5.3 Error 404

Now your **Error 404** page is 100% configurable. You can set up here below options:

- **Title** - this is title for error 404 page
- **Subtitle** - this is subtitle for error 404 page
- **Text** - text message for error 404 page
- **Button** - this is text for button on error 404 page

For each fields you can set up your own text.

4.5.4 Contact form

Translate the most important things in **Contact Form**.

- **Send us a question** - translate "Send us a question"
- **Your name** - translate "Your name"
- **Your e-mail** - translate "Your e-mail"
- **Subject** - translate "Subject"
- **Send message** - translate "Send message"

5. Shortcodes

As you know, shortcodes are really useful in creating pages, and they accelerate your work. That's the main reason why we have created them. Below you'll learn how to use them in the "Caffeine" theme. There is a lot of them and they are easy to use.

5.1 Adding shortcodes in content using wp-editor

You can use shortcodes directly in WP editor. Just click on green circle button with plus inside. After that you'll see whole list of shortcodes. After select right shortcode and click "Insert", the shortcode will be inserted into editor.

5.2 List of available shortcodes & how to use them

1) Alerts - we have made 4 kinds of alerts: **Information** (blue color), **Success** (green color), **Warning** (orange color) and **Error** (red color). To choose right alert for your theme just type exact **style**. Below you can see how each alert looks like:

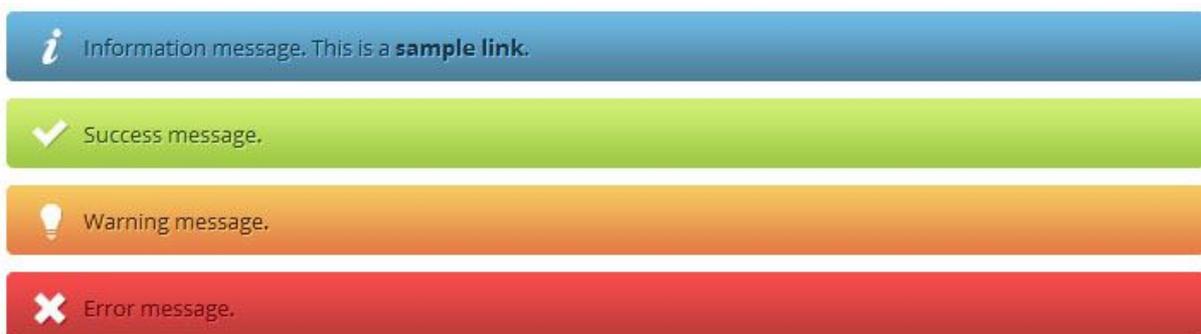

```
[message]Insert your information message content here. <a href="">Sample link</a>.[/message]

[message style="success"]Insert your success message content here.[/message]

[message style="warning"]Insert your warning message content here.[/message]

[message style="error"]Insert your error message content here.[/message]
```

Preview:

For more info and demo please go to [alert shortcode demo](#)

2) Buttons - as name indicates, these are the buttons to use on pages. Attributes for buttons are:

- **link** (link to other page)
- **title** (title for button)
- **target** (optional target for link, ex. "_blank")
- **size** (optional size of button - "normal" is default, you can also choose "small" or "large")
- **background** (background color for button - you can use name of color, ex. "red" or hex ex. "#D33636")
- **color** (color for text - as in background color you can use name of color, ex. "white" or hex ex. "#FFFFFF")
- **text-shadow** (optional text shadow color - you can also use color name, ex. "grey" or hex, ex. "#DDDDDD")

Below you can see the example of buttons shortcode:

```
[button link="" title="Muffin group" background="crimson" color="#eee" text_shadow="#222"]
```

Preview:

For more info and demo please go to [buttons shortcode demo](#)

3) Divider - This item is creating space between elements. It is also aligning for a single line, boxes located underneath.

Divider shortcode has got 2 attributes:

- **height** - enter the amount of the divider height (in px)
- **line** - type 1 if you want to show line, 0 if you don't want

Example of this shortcode below:

```
[divider height="30" line="1"]
```

4) Dropcaps - they are particularly useful when you want to style some text or letters. Dropcaps have got 4 attributes:

- **type** (optional) - default has no attributes but you can also choose "circle" attribute
- **background** (optional can be used only for circle type of dropcap) - here you can use name color, ex. "blue" or hex, ex. "#D33636"
- **color** (optional color for text) - you can use name color, ex. "blue" or hex, ex. "#D33636"
- **text-shadow** (optional color for text shadow) - you can use name color, ex. "blue" or hex, ex. "#D33636"

Below you can see some examples of dropcaps:

```
[dropcap]S[/dropcap]
```

```
[dropcap type="circle"]M[/dropcap]
```

```
[dropcap type="circle" background="#D33636" color="#FFF"
text_shadow="#962323"]D[/dropcap]
```

```
[dropcap type="circle" background="#c6d0dd" color="#414a58"
text_shadow="#e2e8f0"]D[/dropcap]
```

Preview:

For more info and demo please go to [dropcaps shortcode demo](#)

5) Highlights - can be used for highlighting some text. This shortcode has got 2 attributes:

- **background** (highlight color) - you can use name color, ex. "red" or hex, ex. "#D33636"
- **color** (text color) - you can use name color, ex. "red" or hex, ex. "#D33636"

Below you can see how the example looks like:

```
[highlight background="#646566" color="#FFF"] malesuada ultricies curabitur et [/highlight]
```

Preview:

Lorem ipsum dolor sit amet enim. Etiam ullamcorper. Suspendisse a pellentesque dui, non felis. Maecenas malesuada elit lectus felis, **malesuada ultricies curabitur et** ligula. Ut molestie a, ultricies porta urna. Vestibulum commodo volutpat a, convallis ac, laoreet enim. Phasellus fermentum in, dolor. Pellentesque facilisis.

For more info and demo please go to [highlights shortcode demo](#)

6) Images frames - this is a very useful option for embedding images into page. This option has got a long list of available attributes:

- **src** (url to image)
- **align** (optional alignment for image) - available values: none (default), left, right, center
- **alt** (optional) - alternative text for image
- **caption** (optional) - text available under the image
- **link_type** (optional) - type of link can be chosen from 2 values available:
- **zoom** (default) - open image specified by the link in lightbox
- **details** - link to the page/image
- **target** (optional, works only with "details" link_type) - link target, available value: "_blank" (open in new window)
- **width** (optional) - image width
- **height** (optional) - image height

Below you can see some examples of this shortcode:

```
[image src="" link="" align="left" caption="Align left with caption and lightbox"]
```

```
[image src="" link="" link_type="details" target="_blank" align="right" caption="Align right with caption <br /> and link to details <br /> open in new window"]
```

```
[image src="" align="center"]
```

Preview:

For more info and demo please go to [images frames shortcode demo](#)

7) Lists - great tool when you want to present something within the list. We prepared 11 types of lists. Below you can check all of them:

Unordered bullet list

```
<ul class="list">
<li>List item 1</li>
<li>List item 2</li>
</ul>
```

Ordered list

```
<ol class="list">
<li>List item 1</li>
<li>List item 2</li>
</ol>
```

Roman ordered list

```
<ol class="list list_roman">
<li>List item 1</li>
<li>List item 2</li>
</ol>
```

Alpha ordered list

```
<ol class="list list_alpha">
<li>List item 1</li>
<li>List item 2</li>
</ol>
```

Unordered tick list

```
<ul class="list list_tick">
<li>List item 1</li>
<li>List item 2</li>
</ul>
```

Unordered info list

```
<ul class="list list_info">
<li>List item 1</li>
<li>List item 2</li>
</ul>
```

Unordered warning list

```
<ul class="list list_warning">
<li>List item 1</li>
<li>List item 2</li>
</ul>
```

Unordered plus list

```
<ul class="list list_plus">
<li>List item 1</li>
<li>List item 2</li>
</ul>
```

Unordered minus list

```
<ul class="list list_minus">
<li>List item 1</li>
<li>List item 2</li>
</ul>
```

Unordered arrow list

```
<ul class="list list_arrow">
<li>List item 1</li>
<li>List item 2</li>
</ul>
```

Unordered help list

```
<ul class="list list_help">
<li>List item 1</li>
<li>List item 2</li>
</ul>
```

As you can see, all of these lists have only a different kind of class. So if you want to change type of the list, you can easily do so by just changing the name of class..

For more info and demo please go to [lists shortcode demo](#)

8) Table - tables can be used just like regular tables in html. Here you can use tags such as <table>, <thead>, <tbody>, <tr>, <th>, <td> and other html tags. Below you can find some examples of tables:

```
<table>
<thead>
<tr>
<th>Column 1 heading</th>
<th>Column 2 heading</th>
<th>Column 3 heading</th>
```

```

<th>Column 4 heading</th>
</tr>
</thead>
<tbody>
<tr>
<td>Row 1 col 1 content</td>
<td>Row 1 col 2 content</td>
<td>Row 1 col 3 content</td>
<td>Row 1 col 4 content</td>
</tr>
<tr>
<td>Row 2 col 1 content</td>
<td>Row 2 col 2 content</td>
<td>Row 2 col 3 content</td>
<td>Row 2 col 4 content</td>
</tr>
</tbody>
</table>

```

Preview:

Employee	Division	Salary	Bonus
John Smith	Marketing	1300\$	100\$
John Smith	Marketing	1300\$	100\$
John Smith	Marketing	1300\$	100\$

For more info and demo please go to [table shortcode demo](#)

9) Video - we have made two options for most popular videos: **vimeo** and **youtube**.

Vimeo video shortcode has got 3 attributes:

- **video** - vimeo video's ID. This value is placed at the end of every vimeo video after last "/", for example: <http://vimeo.com/19819283>
- **width** - player's width, 700 is highly recommended for left or right sidebar template while 950 for a default one.
- **height** - video player's height

Example of this shortcode below:

```
[vimeo video="1084537" width="700" height="400"]
```

Youtube video shortcode have got 3 attributes:

- **video** - youtube video's ID. This value is placed at the end of every video after "v=" parameter, for example: <http://www.youtube.com/watch?v=YE7Vz1Ltp-4>
- **width** - player's width, 700 is highly recommended for left or right sidebar template while 950 for a default one.
- **height** - video player's height

Example of this shortcode below:

```
[youtube video="YE7Vz1Ltp-4" width="700" height="420"]
```

For more info and demo please go to [video shortcode demo](#)

10) Misc stuff - in this section you can find other options that you can use in this theme. Below you can find examples of these codes:

this one will bold your text:

```
<b>Etiam ullamcorper. Suspendisse a pellentesque dui, non felis.</b>
```

this one will underline your text:

```
<u>Vestibulum commodo volutpat a</u>
```

this one will cursive your text:

```
<i>dapibus, mauris nec malesuada fames</i>
```

this one will crossed your text:

```
<s>dapibus, mauris nec malesuada fames</s>
```

this one will make your text "sub":

```
<sub>ipsum dolor lacus</sub>
```

this one will make your text "sup":

```
<sup>sodales lectus blandit</sup>
```

this one will link your text:

```
<a href="#">Nullam viverra consetetur</a>
```

this one will create horizontal line:

```
<hr />
```

For more info and demo please go to [misc stuff shortcode demo](#)

6. Blog

To create a blog please create a new page *Pages > Add New* and set up the title eg. *Blog*. In field *Template* leave default option on *Default Template*. In bottom section you will find *Page options* such as *Layout* and *Sidebar*. As you probably have guessed, you can choose whether your blog should be on full width or whether you want it with the sidebar (left or right). If you want blog with the sidebar you should also select the right sidebar for your page.

At the end please click *Publish* button on the right.

In the next step please go to *Settings > Reading > Front page displays > A static page > Posts page*, select page that you have already created and click *Save changes*.

We have created some features specifically for bloggers. You will find them in *Theme options panel > Getting started > Blog*. These options are set on default for each new post. Full description of options for blog can be found in section *Theme Options* (section 4.1.4)

Adding new posts works similar to standard WordPress *Posts > Add New*. Posts will be displayed on the already created page.

Images for posts we can add using *featured image*.

For more info about post creation please go to <http://en.support.wordpress.com/posts/>. You can also check the movie about how to create a post <http://www.youtube.com/watch?v=Sa4uimrgNz8>

7. Portfolio

The screenshot shows the WordPress editor for a portfolio item titled "Pellentesque euismod adipiscing". The main content area contains a rich text editor with a toolbar and a text area containing placeholder text. Below the editor is the "Portfolio Item Options" panel, which includes sections for "Layout" (Full width, Left Sidebar, Right Sidebar), "Sidebar" (sajdbar), "Client" (Muffin Group), "Date" (27 september 2012), "Show categories" (On), and "Project URL" (#). To the right of the editor are the "Publish" and "Portfolio categories" panels. The "Publish" panel shows the item is published and includes buttons for "Move to Trash" and "Update". The "Portfolio categories" panel shows a list of categories: Applications, WordPress Themes, and E-commerce systems.

To create a portfolio please start by creating a new page *Pages > Add New* and setting up the title eg. *Portfolio*. In field *Template* set the option *Portfolio template*. In the bottom section you also have *Page options* such as *Layout* and *Sidebar*. As you have probably guessed, you can select whether your portfolio should be in full width or whether it should be with a sidebar (left or right). If you decide on the portfolio with a sidebar you should also select the right sidebar for your page.

We have created some options for *Portfolio page*. You can find them in *Theme options panel > Getting started > Portfolio*. More info about these options can be found in *Theme options panel* (section 4.1.5).

Portfolio items are working just like typical post. To add a new portfolio please go to *Portfolio > Add new*. As you can see you choose similar options as for a blog. Additionally, in the bottom section of the page you have *Page options*. Here you can choose whether you want a full width portfolio or the one with a sidebar (left or right).

When you choose the option with a sidebar **please don't forget to select the right sidebar** for this page.

You can also type *Excerpt* and select *Featured image*. After that please just click *Publish* button.

8. Menu creation

Menu creation works as in default Wordpress.

To add your own menus go to *Appearance > Menus*, type *Name* for your menu and click *Create Menu*. In next step, in section *Theme Locations* for position *Main menu* you need to choose a menu that you've just created.

Now you can add *Pages, Posts* and *Custom Links* from blocks located on the left. At the end you need to save it by clicking on *Save Menu*.

For more info about the menu creation please go to <http://en.support.wordpress.com/menus>

9. Images

For this theme we used some images & icons available on the web.

Icons (**Fugue Icons**), which we used in this template are from <http://p.yusukekamiyamane.com/>

Vectors in illustrations has been used from <http://www.pixeden.com/>

Some images has been also used from <http://www.flickr.com/photos/markjsebastian/> & <http://www.premiumpixels.com/>

Images in slider has been made by our team and they can be used only with our theme. **We do not share any psd files for this images.**

10. SEO

In the era of what is happening in the search engines (especially *Google*) we implemented SEO option in our theme. We hope this will be very helpful for all of you.

To set up general options for SEO please go to *Theme options panel > Getting started > General* . You can set up here things like *Meta Description* or *Meta Keywords* for homepage (this is also default option for each new page).

If you are using *external SEO plugin* you can easily turn it off.

Of course you can also set up options like *Title, Meta Description* and *Meta Keywords* for each page in this theme. You can do it in *Pages > Add page > Page options*.

In section *Page Options* you can find fields like **SEO Title**, **SEO Description** and **SEO Keywords**. If you fill these fields, the page will adopt this values. If you leave this fields empty, the page will adopt default values that are in *Theme options panel > Getting started > General*.

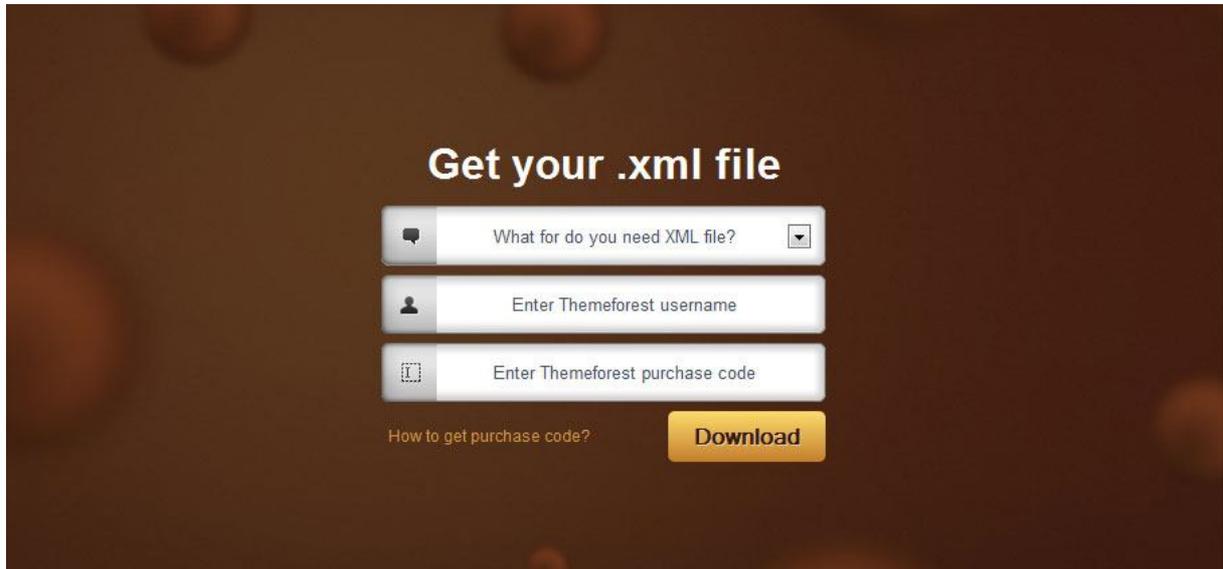

11. Support & contact with us

You can contact us in few ways. It depends on what you exactly need.

- **If you have got a questions about theme**, please place your question on forum <http://forum.muffingroup.com/caffeine> . Please note that we won't answer support question in comments or emails - we prefer to provide you with support on forum because your question can be helpful to other customers.
- Via comments you can send only presale questions or comment that is not related to support.
- **If you have a really big problem and really need to give us access to your account** (that is personal and can only be used by support) you can contact us by using contact form on **our profile's page on Themeforest** <http://themeforest.net/user/muffingroup> - in right bottom section of page.

There is no other way contact with us. So **please don't contact us by sending message on youtube, facebook or twitter** - because it's really difficult for us to control, your question could be lost in these communication channels.

12. XML file with demo content

The screenshot shows a dark-themed web interface with the heading "Get your .xml file". Below the heading are three stacked input fields. The first is a dropdown menu with the placeholder text "What for do you need XML file?". The second is a text input field with the placeholder text "Enter Themeforest username". The third is a text input field with the placeholder text "Enter Themeforest purchase code". Below the third field is a small link that says "How to get purchase code?". To the right of the input fields is a prominent yellow "Download" button.

To **download the XML file with demo content** please firstly go to page: <http://themes.muffingroup.com/xmls/>

In next step please select a product for which you need xml file (in this case please choose **Caffeine**). Please also paste your *themeforest username* and *purchase code*. Afterwards simply click "*Download*" and your file should start downloading.

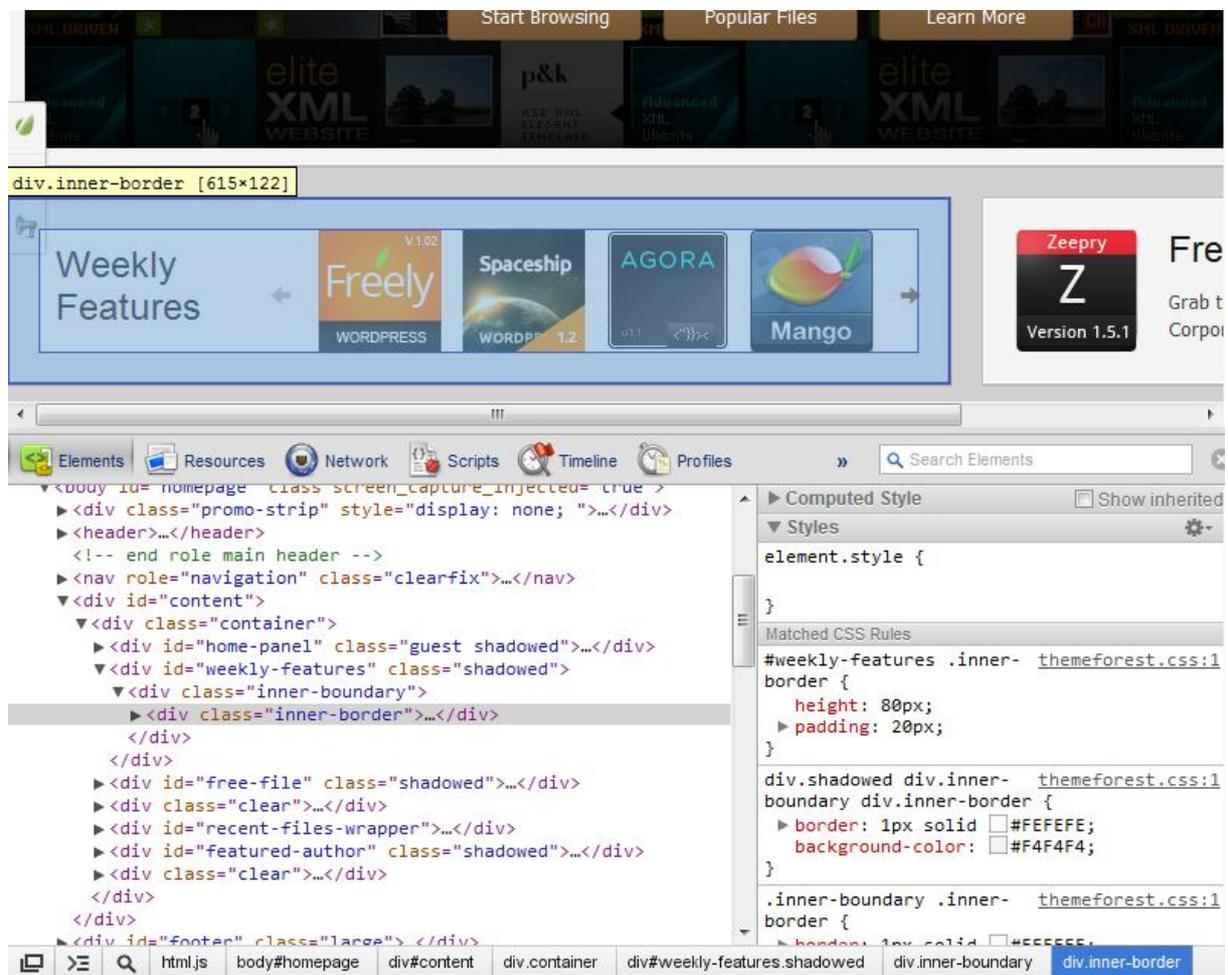

When you get this file onto your computer, you can import it into your wordpress (please import this file only after installing **caffeine theme**). This video (<http://www.youtube.com/watch?v=0fTHYWEGhAc>) will show you how to import this file properly.

13. Advanced theme customization

Sometimes there is a moment when you want to change something on your site that is not available in theme options panel. Something like: font size, color, margin or any other customization. You don't have to ask us about all these things and wait for our response ever again. You can succeed in doing it on your own.

13.1. Google Chrome

To do it you can use two best tools available for free in your web browser. If you're using **Google Chrome** you can inspect element that you need to change by "Inspect element". To do it just hover mouse on element and click "Inspect element". After that you'll see something like on screen below:

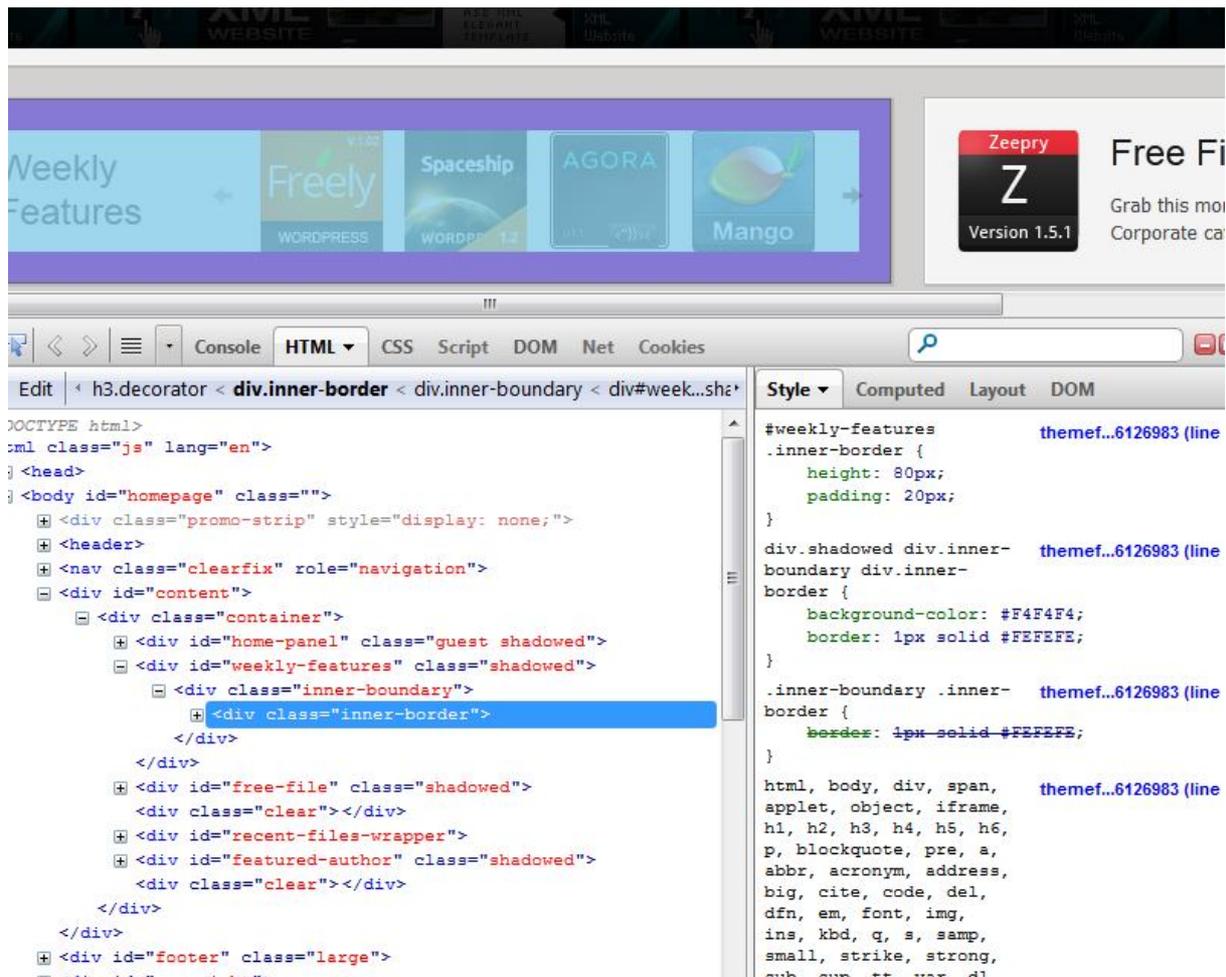

As you can see on the image, on the left side there is a list of styles used for each class/id. If you want to change something, you can edit it on the screen and see how the elements look like. If everything is good and you want to make the same changes on your site please copy right styles from box of right side, for example:

```
#weekly-features .inner-border {
    height: 80px;
    padding: 20px;
}
```

and paste this code into: *Theme options > Styles > Custom CSS code*. If you want to paste this code instead of Custom CSS code you can do it in *custom.css* file. The result will be identical. It's up to you to decide on which way to use.

13.2. Firebug for Firefox

Apart from Google Chrome, we also suggest to use **Firebug for Firefox**. In contrast to Google Chrome, Firebug must be installed at first before you can use it. To do so please click **Firefox in the left top corner > Add-ons** and then search for Firebug and install it. When you get it into your browser you can use it the same way as with Google Chrome but instead of clicking "*Inspect element*" please click "*Inspect element with Firebug*". On the screen below you can see that it will look very similar to Inspect element in Google Chrome.

As you can see on image, on the left side there is a list of styles used for each class/id. If you want to change anything you can edit it on the screen and check what elements look like. If everything is good and you want to make the same changes on your site please copy right styles from box of right side, for example:

```
#weekly-features .inner-border {  
  
    height: 80px;  
    padding: 20px;  
  
}
```

and paste this code into: *Theme options > Styles > Custom CSS code*. If you want to paste this code instead of Custom CSS code you can do it in *style.css* file. The result will be identical. It's up to you to decide on which way to use.

As you can see, it's not difficult to use it and with the support of this tool you can save a lot of time, so we encourage you to try to do it as described and enjoy your new skills.
